Crash Course in Readers' Advisory Cynthia Orr, 2014-12-05 One of the key services librarians provide is helping readers find books they'll enjoy. This crash course will furnish you with the basic practical information you need to excel at readers advisory RA for adults and teens. The question can you recommend a good book can be one of the most daunting you face notwithstanding the fact that recommender tools are ubiquitous. Often uncertainty arises because although librarians are called on to perform such services daily, readers advisory is a skill set in which most have no formal training. This guide will remedy that. It is built around understanding books, reading and readers and will quickly show you how to identify reading preferences and advise patrons effectively. You'll learn about multiple RA approaches such as genre appeal, features and reading interests and about essential tools that can help with RA. Plus you'll discover tips to help you keep up with this ever-changing field. There is no other professional book that covers the full spectrum of skills needed to perform the RA service that is in such great demand in libraries of all kinds. Helping readers find what they want is a sure way to serve patrons and build your library's brand. You will come away from this easy-to-understand crash course with the solid background you need to do both.

Young Adult Resources Today Don Latham, Melissa Gross, 2014-05-21 *Young Adult Resources Today: Connecting Teens with Books, Music, Games, Movies, and More* is the first comprehensive young adult library services textbook specifically written for today's multidimensional information landscape. The authors integrate a research-focused information behavior approach with a literature-focused resources approach and bring together in one volume key issues related to research theory and practice in the provision of information services to young adults. Currently no single book addresses both YA information behaviors and information resources in any detail; instead, books tend to focus on one and give only cursory attention to the other. Key features of this revolutionary book include its success in integrating theory, research, and practice; integrating implications for practice throughout the book; integrating knowledge of resources with professional practice as informed by research; integrating both print and electronic formats throughout within the resource chapters, including websites and social media. Latham and Gross accomplish all this while paying particular attention to the socially constructed nature of young adulthood, diversity, YA development, and multiple literacies. Their coverage of information landscapes covers literature with detailed coverage of both genres and subgenres, movies, magazines, web sites, social media, and gaming. The final chapter covers navigating information landscapes, focusing on real and virtual YA spaces, readers advisory programming, and collaboration. Special attention is paid to program planning and evaluation.

Modern Romance Aziz Ansari, Eric Klinenberg, 2015-06-16 The #1 New York Times Bestseller. An engaging look at the often head scratching frequently infuriating mating behaviors that shape our love lives. *Refinery 29* A hilarious thoughtful and in depth exploration of the pleasures and perils of modern romance from Aziz Ansari the star of *Master of None* and one of this generation's sharpest comedic voices. At some point every one of us embarks on a journey to find love. We meet people date get into and out of relationships all with the hope of finding someone with whom we share a deep connection. This seems standard now but it's wildly different from what people did even just decades ago. Single people today have more romantic options than at any point in human history. With technology our abilities to connect with and sort through these options are staggering. So why are so many people frustrated? Some of our problems are unique to our time. Why did this guy just text me an emoji of a pizza? Should I go out with this girl even though she listed Combos as one of her favorite snack foods? Combos. My girlfriend just got a message from some dude named Nathan. Who's Nathan? Did he just send her a photo of his penis? Should I check just to be sure? But the transformation of our romantic lives can't be explained by technology alone. In a short period of time the whole culture of finding love has changed dramatically. A few decades ago people would find a decent person who lived in their neighborhood. Their families would meet and after deciding neither party seemed like a murderer they would get married and soon have a kid all by the time they were twenty-four. Today people marry later than ever and spend years of their lives on a quest to find the perfect person a soul mate. For years Aziz Ansari has been aiming his comic insight at modern romance but for *Modern Romance* the book he decided he needed to take things to another level. He

teamed up with NYU sociologist Eric Klinenberg and designed a massive research project including hundreds of interviews and focus groups conducted everywhere from Tokyo to Buenos Aires to Wichita They analyzed behavioral data and surveys and created their own online research forum on Reddit which drew thousands of messages They enlisted the world's leading social scientists including Andrew Cherlin Eli Finkel Helen Fisher Sheena Iyengar Barry Schwartz Sherry Turkle and Robb Willer The result is unlike any social science or humor book we've seen before In *Modern Romance* Ansari combines his irreverent humor with cutting edge social science to give us an unforgettable tour of our new romantic world *Allegiant* (Divergent, Book 3) Veronica Roth, 2013-10-22 What if your whole world was a lie The thrillingly dark conclusion to the No. 1 New York Times bestselling DIVERGENT trilogy
