constructing the right prompt You'll also learn to protect yourself from the risks of AI and distinguish AI fakes from the real thing Everything you need to know is here in this book

Copyright as a Constraint on Creating Technological Value Kasper Drazewski, 2024-01-19 Can we regulate something that doesn't exist yet Can Europe create its own Silicon Valley Who gets to create technological value in today's world Whatever happened to the once flourishing idea of rags to riches Will new and exciting innovations only ever come from big tech companies Can the EU establish its own flexible framework for boosting innovation e.g. by facilitating the transformative use of technologies and data This book seeks to answer these questions by exploring the differences in copyright culture in Europe and the United States with its flexible fair use framework The findings are anything but obvious and decades of case law on both sides of the Atlantic tell a story of judges going to great lengths to deal with new challenges while navigating the imperfections of statutory law both where it is too broadly formulated and where it is too prescriptive How can the population's creative potential best be fostered What do software innovations have in common with the evolution of living organisms What are the vulnerabilities of distributed creativity Answers are sought in the processes that came into being during the early years of the digital revolution and were then forced to take a back seat as control of the means of production was increasingly placed in the hands of tech companies The findings and insights presented here are highly relevant for today's digital policymaking Market concentration processes in innovation haven't ceased they are ongoing And in an age where data driven services are creating and reinforcing global oligopolies the question posed by the U.S. Supreme Court in *Google v. Oracle* is now more relevant than ever who should hold the keys to digital innovation

Caring is Sharing — Exploiting the Value in Data for Health and Innovation Maria Hägglund, Madeleine Blusi, Stefano Bonacina, Lina Nilsson, Inge Cort Madsen, Sylvia Pelayo, Anne Moen, 2023-06-15 Modern information and communication technologies make it easier for individuals to be involved in their own health and social care They also facilitate contact between individuals and service providers and deliver more efficient tools for healthcare staff Artificial Intelligence AI promises to bring even more benefits in the future with more effectiveness and the provision of decision support This book presents the proceedings of the 33rd Medical Informatics Europe Conference MIE2023 held in Gothenburg Sweden from 22 to 25 May 2023 The theme of MIE2023 was Caring is Sharing Exploiting Value in Data for Health and Innovation stressing the increasing importance of sharing digital health data and the related challenges The sharing of health data is developing rapidly both in Europe and beyond so the focus of the conference was on the enabling of trustworthy sharing of data to improve health Topics covered include healthcare community care self care public health and the innovation and development of future proof digital health solutions and the almost 300 papers divided into 10 chapters also cover important advances in the sub domains of biomedical informatics decision support systems clinical information systems clinical research informatics knowledge management and representation consumer health informatics natural language processing public health informatics privacy ethical and societal aspects among them Describing innovative
