The book entitled *Pedagogy-Driven Technology Integration in English Language Teaching* discusses pedagogical soundness and appropriateness of technology to address problems or issues in the teaching and learning process, especially in the English as a Foreign Language (EFL) learning context. It is a relatively new genre, similar to a book review section in academic journals and magazines. With technology's rapid and disruptive development, teaching and learning in the EFL context may not be the same anymore. Numerous tools, prominently digital ones, have been massively utilized within and beyond the classroom walls. Yet one thing remains the same: the pedagogical aspects comprising clear and scaffolded learning stages incorporated with technologies must present insights and bring about benefits to the instruction.
