Contemporary Aesthetics Emmie Malone, Elizabeth Scarbrough, 2025-10-27 An Introduction to Contemporary Aesthetics Art Community and Experience gives students and other readers a comprehensive sense of the dynamic issues and problems in aesthetics and philosophy of art today Each of the 14 chapters is written by a different expert in the field and together they cover a wide range of methodological approaches and perspectives including those from analytic and Continental philosophy non Eurocentric global traditions and critical stances taken up by feminist philosophers and philosophers of race In addition the volume makes use of recent empirical work on art and beauty as well as examples of artistic expressions from cultures from around the world In contrast to other coursebooks which are often structured entirely around artforms this volume frames much of its contents around core aesthetic concepts like good or bad taste interpretation or authenticity with each chapter devoted to a different concept Within each chapter the reader will find a range of engaging artforms and experiences The contents of the volume are laid out in four parts the first focuses on foundational questions in aesthetics and the second on key aesthetic concepts The third part focuses on applied questions relating to particular artforms and genres e g horror comedy AI art games Finally the last part of the volume takes a wider but still practical view focusing on why aesthetic life matters to us both as a society and as individuals Key Features Written in a non technical style for readers new to aesthetics and with little or no background in philosophy or the study of the arts Draws on examples readers encounter in everyday life and popular culture from Drake to Philly cheesesteaks Deals with questions that concern many college students today Does authenticity even matter and if so why What s wrong with enjoying the work of an immoral artist How are our homes and schools important places of aesthetic meaning Each chapter is written as a biased survey with clear coverage of the historical and contemporary literature on the topic but also from a distinct subjective point of view Non Eurocentric philosophies or examples are included throughout the book highlighting the rich and diverse philosophical work from around the globe Discussion Questions offer student readers opportunities to engage more fully with the problems raised in the text Suggestions for Further Reading at the end of each chapter identify the most promising avenues for further research on the topic

AI for Behavioural Science Stuart Mills, 2022-12-08 This book is a concise introduction to emerging concepts and ideas found at the intersection of contemporary behavioural science and artificial intelligence The book explores how these disciplines interact change and adapt to one another and what the implications of such an interaction are for practice and society AI for Behavioural Science book begins by exploring the field of machine behaviour which advocates using behavioural science to investigate artificial intelligence This perspective is built upon to develop a framework of terminology that treats humans and machines as comparable entities possessing their own motive power From here the notion of artificial intelligence systems becoming choice architects is explored through a series of reconceptualisations The architecting of choices is reconceptualised as a process of selection from a set of choice architectural designs while human behaviour is reconceptualised in terms of probabilistic outcomes The material difference between the so called manual nudging and

automatic nudging or hypernudging is then explored The book concludes with a discussion of who is responsible for autonomous choice architects
