College Rankings Near Me Warranty:

The College Cost Disease Robert E. Martin, 2011-01-01 College cost per student has been on the rise at a pace that matches or exceeds healthcare costs Unlike healthcare though teaching quality has declined and rapidly rising costs and declining quality are not trends easily forgiven by society The College Cost Disease addresses these problems providing a behavioral framework for the chronic cost quality consequences with which higher education is fraught Providing many compelling insights into the issues plaguing higher education Robert Martin expounds upon H R Bowen s revenue theory of cost by detailing experience good theory the principal agent problem and non profit status Reputation competition dominates higher education Students and their parents and public opinion in general associate higher tuition with higher quality and greater accolades price is used as a proxy for quality only when consumers are uncertain about quality prior to purchase Higher education services are the most complex types of experience goods a service whose quality can only be determined after a purchase has been made Applying formal economic theory to higher education Robert Martin examines how and why attempts to control costs are controversial and the damaging effects these controversies have on institutions reputations Arguing that the college access problem cannot be solved until colleges and universities find a way to control their costs this book brings to the fore the leading ideas that will bring about much needed budgetary reform in higher education

Ratings Peter Brusov, Tatiana Filatova, Natali Orekhova, 2020-12-04 This book presents new methodologies for rating non financial issuers and project ratings based on the BFO Brusov Filatova Orekhova theory of capital cost and structure and its perpetuity limit Modigliani Miller theory as well as modern investment models created by the authors It first provides a critical analysis of the methodological and systemic shortcomings of the current credit ratings of non financial issuers and project ratings In order to increase the objectivity and accuracy of rating assessments it then modifies the BFO theory for companies of arbitrary age as well as and the perpetuity limit Modigliani Miller theory for rating needs The authors also incorporate the financial indicators used in the rating methodology into both the BFO theory and the Modigliani Miller theory Within the framework of the modified BFO theory for rating needs they then present a detailed study of the dependence of the weighted average cost of capital of WACC used as the discount rate for discounting financial flows on the financial ratios used in the rating on the age of the company on the leverage level and on the level of taxation for a wide range of values of equity cost and debt cost for companies of arbitrary age This makes it possible to correctly assess of the discount rate taking into account the values of financial ratios The use of well established corporate finance theories BFO theory and its perpetuity limit opens up new horizons in the rating industry providing an opportunity to switch from mainly qualitative methods for determining the creditworthiness of issuers to mainly quantitative methods in rating and as such improving the quality and accuracy of rating scores

Fuzzy Logic and the Semantic Web Elie Sanchez, 2006-02-20 These are exciting times in the fields of Fuzzy Logic and the Semantic Web and this book will add to the excitement as it is the first volume to focus on the growing connections between these two fields This book is expected to be a valuable aid to anyone considering the application of Fuzzy Logic to the Semantic Web because it contains a number of detailed accounts of these combined fields written by leading authors in several countries The Fuzzy Logic field has been maturing for forty years These years have witnessed a tremendous growth in the number and variety of applications with a real world impact across a wide variety of

domains with humanlike behavior and reasoning And we believe that in the coming years the Semantic Web will be major field of applications of Fuzzy Logic This book the first in the new series Capturing Intelligence shows the positive role Fuzzy Logic and more generally Soft Computing can play in the development of the Semantic Web filling a gap and facing a new challenge It covers concepts tools techniques and applications exhibiting the usefulness and the necessity for using Fuzzy Logic in the Semantic Web It finally opens the road to new systems with a high Web IQ Most of today s Web content is suitable for human consumption The Semantic Web is presented as an extension of the current web in which information is given well defined meaning better enabling computers and people to work in cooperation For example within the Semantic Web computers will understand the meaning of semantic data on a web page by following links to specified ontologies But while the Semantic Web vision and research attracts attention as long as it will be used two valued based logical methods no progress will be expected in handling ill structured uncertain or imprecise information encountered in real world knowledge Fuzzy Logic and associated concepts and techniques more generally Soft Computing has certainly a positive role to play in the development of the Semantic Web Fuzzy Logic will not supposed to be the basis for the Semantic Web but its related concepts and techniques will certainly reinforce the systems classically developed within W3C In fact Fuzzy Logic cannot be ignored in order to bridge the gap between human understandable soft logic and machine readable hard logic None of the usual logical requirements can be guaranteed there is no centrally defined format for data no guarantee of truth for assertions made no guarantee of consistency To support these arguments this book shows how components of the Semantic Web like XML RDF Description Logics Conceptual Graphs Ontologies can be covered with in each case a Fuzzy Logic focus First volume to focus on the growing connections between Fuzzy Logic and the Semantic Web Keynote chapter by Lotfi Zadeh The Semantic Web is presently expected to be a major field of applications of Fuzzy Logic It fills a gap and faces a new challenge in the development of the Semantic Web It opens the road to new systems with a high Web IQ Contributed chapters by Fuzzy Logic leading experts
