World Wide Waste: How Digital Is Killing Our Planet and What We Can Do About It Gerry McGovern, 2020-03-13 Speaking out when it's unpopular. Back in the day, Henry David Thoreau raged at the robber barons, the big shots of their age, despoiling the environment in the name of progress. Deep in the throes of the seemingly unstoppable growth of tech, a modern day Thoreau has emerged in the guise of Gerry McGovern, decrying the massive hidden negative impacts of tech on the environment. McGovern has thoroughly documented in *World Wide Waste* how tech damages the Earth and what we should be doing about it. It is not just the acres of discarded computer hardware conveniently dumped in Third World countries. Every time an email is downloaded, it contributes to global warming. Every tweet, search, check of a webpage creates pollution. Digital is physical. Those data centers are not in the Cloud. They're on land, in massive physical buildings packed full of computers hungry for energy. It seems invisible. It seems cheap and free. It's not. Digital costs the Earth.

The Reputation Economy Michael Fertik, David C. Thompson, 2015-01-20 Reputation is power. Your reputation defines how people see you and what they will do for you. It determines whether your bank will lend you money to buy a house or car, whether your landlord will accept you as a tenant, which employers will hire you, and how much they will pay you. It can even affect your marriage prospects. And in the coming Reputation Economy, it's getting more powerful than ever. Because today, thanks to rapid advances in digital technology, anyone can access huge troves of information about you: your buying habits, your finances, your professional and personal networks, and even your physical whereabouts at any time. In a world where technology allows companies and individuals alike to not only gather all this data but also aggregate it and analyze it with frightening speed, accuracy, and sophistication, our digital reputations are fast becoming our most valuable currency. Here, Michael Fertik, CEO of Reputation.com and one of Silicon Valley's leading futurists, will draw on the insider tools, insights, research, and secrets that have made Reputation.com the leading reputation management firm to show how to capitalize on the trends the Reputation Economy will trigger to improve your professional, financial, and even social prospects.
