Eat Rich, Live Long Ivor Cummins, 2018-02-27 You can take control of your health, lose weight, prevent disease, and enjoy a long and healthy life. The unique nutritional program outlined in *Eat Rich Live Long* is designed by experts to help you feel great while you eat delicious and satisfying foods. Millions of people have gotten healthy through low carb plans over the years, and a growing number have discovered the wonderful benefits of ketogenic keto nutrition. Many are confused though about how low carb they should go. Now *Eat Rich Live Long* reveals how mastering the low carb keto spectrum can maximize your weight loss and optimize your health for the long term. In this book, Ivor Cummins, a world-class engineer and technical master for a huge global tech corporation, and Dr. Jeff Gerber, a family doctor who is widely regarded as a global leader in low carb nutrition, team up to present their unique perspectives from their extensive clinical, medical, and scientific research experience. Together, Cummins and Gerber crack the code that shows you how to eat the foods you enjoy, lose weight, and regain robust health. They reveal how the nutritional experts have gotten it so wrong for so long by demonizing healthy natural fats in our diets and focusing on cholesterol and LDL as the villains. In fact, as the authors reveal by drawing on the latest peer-reviewed global research, eating a high percentage of natural fats, a moderate amount of protein, and a low percentage of carbs can help you lose weight, prevent disease, satisfy your appetite, turn off your food cravings, and live longer. The heart of *Eat Rich Live Long* is the book's prescriptive program, which includes a seven-day eating plan, a fourteen-day eating plan, and more than fifty gourmet-quality low carb, high fat recipes illustrated with gorgeous full-color photographs for breakfasts, lunches, appetizers, snacks, dinners, drinks, and desserts. Low carb never tasted so good. Nutritional sacred cows are constantly being challenged in the media: How much fat should we eat, and which kinds of fats are best? Which fats can contribute to diabetes, heart disease, and early mortality? Does a high protein diet increase muscle mass and lead to vigorous health, or can it promote aging, cancer, and early mortality? Which vitamins and minerals should we be taking, if any? How do we change our metabolism so that our bodies burn fat instead of all the sugars we consume? Does intermittent fasting really work? *Eat Rich Live Long* lays out the truth based on the latest scientific research, and it will change the way you look at eating. Meanwhile, you will lose weight and look and feel great.
