Divided Legacy Vols I IV is a history of Western medical philosophy from the time of Hippocrates to the twentieth century treating it as a unified system of thought rather than a series of fortuitous discoveries Dr Coulter interprets the development of medical ideas as the product of a conflict between two opposed systems of thought Empiricism and Rationalism This third volume of *Divided Legacy* continues the account of the conflict between the Empirical and the Rationalist approaches to therapeutics but introduces a socio economic dimension which had earlier been lacking In the early nineteenth century Samuel Hahnemann's formulation of the Empirical therapeutic doctrine which he called homeopathy It flourished especially in the United States This volume traces the history of the rise and decline of this formulation of Empirical therapeutics in the nineteenth century United States It analyzes the interaction between the homeopathic doctrines and those of the orthodox school and attempts to illustrate the influence of socio economic constraints on the movement of medical thought during this period
