Considering a Value-Added Tax for Central and Eastern European Countries Sijbren Cnossen, 1991-07-01 In the course of introducing a market oriented tax system most Central and Eastern European countries are actively considering the merits of a value added tax VAT This paper examines a wide range of social economic structural and administrative issues that are pertinent to the introduction of a VAT These issues have regard to the burden distribution of the VAT its effect on the price level and economic growth as well as the coverage of the tax the definition of the base and the choice of the rate structure Various legal and administrative aspects are also reviewed The paper draws on the experience with value added taxation of the member states of the European Community EC and other countries that belong to the Organisation for Economic Cooperation and Development OECD *Do Taxes Matter for Long-Run Growth? Harberger's Superneutrality Conjecture* Mr. Gian Milesi-Ferretti, Mr. Enrique G. Mendoza, Patrick K. Asea, 1995-08-01 Harberger's superneutrality conjecture contends that although in theory the mix of direct and indirect taxes affects investment and growth in practice growth effects of taxation are negligible This paper provides evidence in support of this view by testing the predictions of endogenous growth models driven by human capital accumulation The theoretical analysis highlights implications of different taxes for growth and investment in these models The empirical work is based on cross country regressions and numerical simulations using a new methodology for estimating aggregate effective tax rates Results show significant investment effects from income and consumption taxes that are consistent with small growth effects The results are robust to the introduction of other growth determinants **International Vat Harmonization** Mr. Steven A. Symansky, Mr. Jacob A. Frenkel, Assaf Razin, 1991-02-01 This paper highlights key macroeconomic issues related to VAT harmonization A model is developed which emphasizes the effects of changes in the time profile of various taxes on international behavior Dynamic simulations reveal that the macroeconomic and welfare implications of VAT harmonization including conflicts of interest depend critically on the tax system and the degree of substitution governing temporal and intertemporal allocations We also demonstrate that the effects of revenue neutral tax conversions between income and consumption tax systems undertaken by a single country

depend critically on international differences in behavior *Kiplinger's Personal Finance* ,1999-01 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics Encyclopedia of Portal Technologies and Applications Tatnall, Arthur,2007-04-30 Informatique

Is there a Need for Harmonizing Capital Income Taxes within EC Countries? International Monetary Fund,1990-01-01 This paper describes how growing economic integration within the European Community increases the scope for any one EC country to impose adverse externalities on other member countries by manipulating its capital income taxes After examining several alternatives to concerted tax harmonization the paper concludes that there is a need to harmonize capital income taxes within the EC as the Community moves toward a unified market with free capital movements and fixed nominal exchange rates The harmonization process could start by agreeing on the tax base followed by setting minimum statutory rates *Implications of a Lower Capital Gains Tax Rate in the United States* International Monetary Fund,1989-12-13 This paper reviews the literature on the revenue implications of a lower capital gains tax rate in the United States The existing empirical research indicates that the timing of realizations is sensitive to tax changes but is inconclusive on the long run revenue implications No study claims that tax revenues would increase very much on a permanent basis The paper concludes that other aspects of a lower capital gains tax rate deserves more attention in particular its impact on resource allocation and tax arbitrage **Jacaranda Key Concepts in VCE Economics 2 Units 3 and 4 11e learnON and Print** Richard Morris,2023-01-04 This combined print and digital title provides 100% coverage of the VCE Study Design for Economics The textbook comes with a complimentary activation code for learnON the powerful digital learning platform making learning personalised and visible for both students and teachers Students can start preparing from lesson one with past VCAA exam questions embedded in every lesson Practice customisable SACs available for all Units to build student competence and confidence **Real Estate Ownership, Investment and Due Diligence 101** Leonard P.
