Agents for Games and Simulations II F. Dignum,2011-01-14 While today s game engines and multi agent platforms cross fertilize each other to some extent the technologies used in these areas are not readily compatible due to some differences in their primary concerns Where game engines prioritize efficiency and central control

multi agent platforms focus on agent autonomy and sophisticated communication capabilities This volume gives an overview of the current state of the art for people wishing to combine agent technology with serious games This state of the art survey contains a collection of papers presented at AGS 2010 the Second International Workshop on Agents for Games and Simulations held on May 10 2010 in Toronto as well as extended versions of papers from other workshops and from the AAMAS conference The 14 papers are organized in three topical sections focusing on architectures combining agents and game engines on the training aspects of the games on social and organizational aspects of games and agents respectively

This proceedings volume brings together some 189 peer reviewed papers presented at the International Conference on Information Technology and Computer Application Engineering held 27 28 August 2013 in Hong Kong China Specific topics under consideration include Control Robotics and Automation Information Technology Intelligent Computing and

Experiments of the Mind Emily Martin, 2022-01-25 This book is an ethnographic investigation of the everyday professional lives of experimental cognitive psychologists aimed at conveying to readers a sense of the social world of the laboratory and explaining how the field produces knowledge about human cognition Emily Martin did fieldwork in three labs conducting research in normal human cognition In the early days of her fieldwork Martin was struck by how irrelevant her own subjective experience was to the experimenters What researchers conducting the experiments were seeking was data about how her brain responded to stimuli such as photographs and videos Her own responses to the situation the set up of the experiment etc were very much beside the point This led Martin to wonder when in the history of this field introspection and related messy data concerning the social conditions of lab experimentation came to be expelled Her book examines this history provides a comparison with the history of her own field anthropology and discusses the evolution of a pillar of contemporary experimental cognitive psychology the psychological experiment In the course of this book Martin reports on her discussions with practicing experimental psychologists about the efficacy of placing persons in such unusual settings in the search for general knowledge What emerges is an account of the cognitive psychology experiment as an artificial construction in which a certain kind of knowledge is produced and a certain kind of human subject is created But this book is not a debunking of the discipline of experimental cognitive psychology Martin readily acknowledges the fact that real knowledge is produced in these highly structured and artificial experimental settings She does however question the tendency within this discipline to dismiss the significance of the social and cultural setting of the formal psychological experiment and argues that the field promotes a truncated view of the human subject and its capacities
