Deep Learning for Coders with fastai and PyTorch Jeremy Howard, Sylvain Gugger, 2020-06-29 Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies But as this hands on guide demonstrates programmers comfortable with Python can achieve impressive results in deep learning with little math background small amounts of data and minimal code How With fastai the first library to provide a consistent interface to the most frequently used deep learning applications Authors Jeremy Howard and Sylvain Gugger the creators of fastai show you how to train a model on a wide range of tasks using fastai and PyTorch You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes Train models in computer vision natural language processing tabular data and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy speed and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by PyTorch cofounder Soumith Chintala

c't Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots It explains why language models make mistakes and how they can be minimised This not only helps when you send questions and orders to one of the chatbots offered online If you do not want to or are not allowed to use the cloud services for data protection reasons for example you can also set up your own voice AI The c't editorial team explains where to find a suitable voice model how to host it locally and which service providers can host it The fact that generative AI is becoming increasingly productive harbours both opportunities and risks Suitable rules for the use of AI in schools training and at work help to exploit opportunities and minimise risks

Real-World Natural Language Processing Masato Hagiwara, 2021-12-14 Training computers to interpret and generate speech and text is a monumental challenge and the payoff for reducing labor and improving human computer interaction is huge The field of Natural language processing NLP is advancing rapidly with countless new tools and practices This unique book offers an innovative collection of NLP techniques with applications in machine translation voice assistants text generation and more Real world natural language processing shows you how to build the practical NLP applications that are transforming the way humans and computers work together Guided by clear explanations of each core NLP topic you'll

create many interesting applications including a sentiment analyzer and a chatbot Along the way you ll use Python and open source libraries like AllenNLP and HuggingFace Transformers to speed up your development process *Technology and Practice of Passwords* Stig F.
