European Dept., 2023-07-28 Estonia has made remarkable progress over the past two decades achieving steady convergence towards more advanced EU economies However signs of erosion in external performance have emerged in recent years reflecting rapid growth in unit labor cost and real exchange rate appreciation Russia's invasion of Ukraine triggered a large rise in inflation supply chain disruptions and slower growth in key trading partners in the Baltic region In Estonia these developments combined with fiscal tightening in 2022 have led to a sharp economic downturn while deceleration in productivity has exacerbated competitiveness erosion OECD Economic Outlook, Volume 2024 Issue 2 OECD, 2024-12-04

a continued and lasting decline in inflation enhanced efforts to establish a credible fiscal path that will secure debt sustainability and ambitious reforms to raise sustainable and inclusive growth in the medium term This issue includes an assessment of the global economic situation a chapter on developments in labour shortages and associated policy considerations and a chapter summarising developments and providing projections for each individual country Coverage is provided for all OECD members as well as for selected partner economies *J.K.
