Intelligence and Applications Poonam Bansal,Meena Tushir,Valentina Emilia Balas,Rajeev Srivastava,2020-07-01 This book gathers high quality papers presented at the International Conference on Artificial Intelligence and Applications ICAIA 2020 held at Maharaja Surajmal Institute of Technology New Delhi India on 6 7 February 2020 The book covers areas such as artificial neural networks fuzzy systems computational optimization technologies and machine learning **Reader Bot** Naomi S. Baron,2026-01-20 What happens to human reading when AI bots can do it for us Explosive developments in artificial intelligence have awed everyday users with the technology s ability to draw do computer coding and especially to write Those AI generated essays and poems legal briefs and responses to requests for information are all visible evidence of large language models at work What we don t see is the critical prior step before it can write AI needs to read While AI s written outcomes are remarkably similar to what a diligent student lawyer or researcher might produce AI doesn t read the way that humans do Now that AI is proving an adept reader what happens to our own reading skills and motivations especially at a time when both voluntary and school reading are increasingly on the decline We have learned that when we let chatbots write for us there are pros and cons to handing over our virtual pens It s critical that we also think through the consequences of relinquishing reading a deeply human activity to bots What do we stand to gain and lose when we let AI read for us Tracing the intersecting trajectories of AI and reading Reader Bot tackles this vital question revealing why we must be thoughtful about how we welcome AI as reader into our lives Building a God Christopher DiCarlo,2025-01-21 Renowned ethicist provides essential guide to successfully navigating the future AI landscape In Building a God Christopher DiCarlo explores the profound implications of artificial intelligence surpassing human intelligence a destiny that seems not just possible but inevitable At this critical crossroad in our evolutionary history DiCarlo a renowned ethicist in AI delves into the ethical mazes and technological quandaries of our future interactions with superior AI entities From healthcare enhancements to the risks of digital manipulation this book scrutinizes AI s dual potential to elevate or devastate humanity DiCarlo advocates for robust global governance of AI proposing visionary policies to safeguard our society AI will positively impact our lives in myriad ways from healthcare to education manufacturing to sustainability AI powered tools will improve productivity and add ease to the most massive global industries and to our own personal daily routines alike But we have already witnessed the tip of the iceberg when it comes to the risks of this new technology AI algorithms can manipulate human behavior spread disinformation shape public opinion and impact democratic processes Sophisticated technologies such as GPT 4 Dall E 2 and video Deepfakes allow users to create distort and alter information Perhaps more troubling is the foundational lack of transparency in both the utilization and design of AI models What ethical precepts should be determined for AI and by whom And what will happen if rogue abusers decide not to comply with such ethical guidelines How should we enforce these precepts Should the UN develop a Charter or Accord which all member states agree to and sign off on Should governments develop a form of international regulative body similar to the International Atomic Energy Agency IAEA which

regulates not only the use of nuclear energy but nuclear weaponry as well In this incisive and cogent meditation on the future of AI DiCarlo argues for the ethical governance of AI by identifying the key components obstacles and points of progress gained so far by the global community and by putting forth thoughtful and measured policies to regulate this dangerous technology **Technologies and Applications of Artificial Intelligence** Wei-Ta Chu,Chih-Ya Shen,Hong-Han Shuai,2025-05-14 This two volume set CCIS 2414 and CCIS 2415 constitutes the refereed proceedings of the 29th International Conference on Technologies and Applications of Artificial Intelligence TAAI 2024 held in Hsinchu Taiwan during December 6 7 2024 The 49 full papers presented in these two volumes were carefully reviewed and selected from 147 submissions The papers are organized in the following topical sections Part I Data Robustness Image Analysis Knowledge Representation and Management Games Machine Learning and Applications AI Studies JSAI Special Session 1 Part II JSAI Special Session 2 Japan Special Session 3 International Track Special Session **Oddest Book Titles** Hugo Raines,AI,2025-03-31 Oddest Book Titles explores the fascinating and often humorous world of unusual book titles It examines how these titles whether intentionally provocative or accidentally absurd reflect cultural trends linguistic evolution and the dynamics between authors publishers and readers The book serves as both a reference guide and a linguistic exploration offering insights into how titles influence book selection and our perception of information Did you know that some titles are so grammatically perplexing they become instant conversation starters Or that irrelevant titles can sometimes boost a book s appeal through sheer novelty The book progresses systematically beginning with a definition of oddness in titles and then categorizing them thematically It dissects titles based on various characteristics such as unintentional humor grammatical oddities irrelevance or intentional controversy Through examples and analysis the book reveals how a title is more than just a label it s a gateway to the content capable of attracting or repelling readers This analysis drawing from linguistics marketing and cultural studies offers a well rounded view of the quirks and curiosities within the realm of book publishing and language arts **Resonanz in Zwischenräumen** Lena Mertins,Maike Wiemann,2024 Wer Resonanzen sp rt lebt in der Realit t abseits von virtuellen und funktionellen Zw ngen Architektur kann reale Resonanzr ume schaffen und die Wahrnehmung der Wirklichkeit unbeeinflusst von Virtualit t st rken Lena Mertins Maike WiemannLaut dem Soziologen und Politikwissenschaftler Hartmut Rosa steht die heutige globalisierte Gesellschaft unter dem Einfluss von Steigerungszwang und Beschleunigung Sowohl im heutigen St dtebau als auch in der heutigen Architektur zeigt sich dieser Steigerungszwang in Form von profitorientierten und wenig individuellen Produkten Resonante R ume wie sie beispielsweise in historischen St dten aufzufinden sind werden mit einer zunehmenden Verdichtung geschw cht Aufgrund von wenigen neu entwickelten resonanten R umen in der Stadt besteht die M glichkeit einer steigenden Raumamnesie Dieses Buches nimmt sich experimentell dieser Resonanzen und R umlichkeiten an die zunehmend in Vergessenheit geraten Die Autorinnen untersuchen mit praktischen experimentellen Raumauseinandersetzungen ob R ume in der heutigen Gesellschaft noch

Biography Market Research Emily Williams,AI,2025-02-19 Biography Market Research explores why certain biographies achieve widespread success while others do not It examines the biography genre through the lens of market analysis revealing publishing trends reader preferences and effective marketing strategies The book challenges the assumption that inherent subject interest alone dictates success arguing that strategic framing and targeted marketing are equally crucial Did you know that understanding the psychology behind why readers choose biographies whether for inspiration escapism or historical insight is key to crafting a successful book Or that the historical evolution of narrative styles in biographies has profoundly impacted reader expectations The book s approach involves a data driven exploration of the biography industry using industry sales data reader surveys and case studies of both successful and unsuccessful biographical works It progresses by first introducing core concepts and then delving into the performance of different biographical subgenres Next it explores reader preferences based on demographics Finally it dissects the business aspects like publishing contracts providing actionable strategies for authors and publishers to maximize their impact in the book market **Waiting for Robots** Antonio A. Casilli,2025-01-08 An essential investigation that pulls back the curtain on

automation like AI to show human workers hidden labor Artificial Intelligence fuels both enthusiasm and panic Technologists are inclined to give their creations leeway pretend they re animated beings and consider them efficient As users we may complain when these technologies don t obey or worry about their influence on our choices and our livelihoods And yet we also yearn for their convenience see ourselves reflected in them and treat them as something entirely new But when we overestimate the automation of these tools award winning author Antonio A Casilli argues we fail to recognize how our fellow humans are essential to their efficiency The danger is not that robots will take our jobs but that humans will have to do theirs In this bracing and powerful book Casilli uses up to the minute research to show how today s technologies including AI continue to exploit human labor even ours He connects the diverse activities of today s tech laborers platform workers like Uber drivers and Airbnb hosts micro workers including those performing atomized tasks like data entry on Amazon Mechanical Turk and the rest of us as we evaluate text or images to show we re not robots react to Facebook posts or approve or improve the output of generative AI As Casilli shows us algorithms search engines and voice assistants wouldn t function without unpaid or underpaid human contributions Further he warns that if we fail to recognize this human work we risk a dark future for all human labor Waiting for Robots urges us to move beyond the simplistic notion that machines are intelligent and autonomous As the proverbial Godot robots are the bearers of a messianic promise that is always postponed Instead of bringing prosperity for all they discipline the workforce so we don t dream of a world without drudgery and exploitation Casilli s eye opening book makes clear that most automation requires human labor and likely always will shedding new light on today s consequences and tomorrow s threats of failing to recognize and compensate the click workers of today
