ECIW2012- 11th European Conference on Information warfare and security Robert Erra,2012 Die Frauen der Red-Power-Bewegung Rachel Huber,2023-04-17 Die Studie greift aktuelle gesellschaftliche Themen wie Digitalisierung fehlende weibliche Repräsentation in Erinnerungskulturen und die männliche Prägung des kulturellen Gedächtnisses auf. Anhand eines exemplarischen Falles untersucht Rachel Huber wie man einseitige Meistererzählungen mit den bislang unsichtbaren Seiten der Geschichte ergänzen kann. Sie geht den Spuren von historischen Akteurinnen und Zeitzeuginnen der Red Power Bewegung dem indigenen Widerstand in den USA in den 1960er und 1970er Jahren auf sozialen Plattformen wie Facebook, Twitter und Instagram nach und vergleicht diese mit den Spuren in analogen Archiven in den USA und Europa. Dadurch macht sie sichtbar, dass Red Power Aktivistinnen massgeblich für den Erfolg des politischen Widerstandes waren.

Illegal Literature David S. Roh,2015-12-31 What is the cultural value of illegal works that violate the copyrights of popular fiction? Why do they persist despite clear and stringent intellectual property laws? Drawing on the disciplines of new media law and literary studies, *Illegal Literature* suggests that extralegal works such as fan fiction are critical to a system that spurs the evolution of culture. Reconsidering voices relegated to the cultural periphery, David S. Roh shows how infrastructure in the form of legal policy and network distribution slows or accelerates the rate of change. He analyzes the relationship between intellectual property rights and American literature in two recent copyright disputes. And in comparing American fan fiction and Japanese dojinshi, he illustrates how infrastructure and legal climates detract from or encourage fledgling creativity. *Illegal Literature* fills a crucial gap between the scholarly and the popular by closely examining several modes of marginalized cultural production. Roh makes the case for protecting an environment conducive to literary heresy: the articulation of an accretive rather than solitary authorial genius and the idea that letting go rather than holding on is important to a generative creative process. In a media ecology inundated by unauthorized materials, *Illegal Literature* argues that the proliferation of unsanctioned texts may actually benefit literary and cultural development.

FUTURE TRENDS IN BLOCKCHAIN SCALABILITY, INTEROPARABILITY, AND BEYOND

MACHINE LEARNING Manoj Ram Tammina,Ravi U. Kalkundri,Ismail Keshta,Prof. Niraj Upadhayaya,2023-10-30 A blockchain is a distributed public ledger that records transactions in a series of linked blocks that can be accessed by anyone Before being added to the chain the data block is time stamped and verified Each block builds upon the data in the one before it The data is very difficult to forge due to the mathematical complexity of the storage system The legacy of cryptocurrencies has helped turn the cryptographic term blockchain into a trendy catchphrase A lot of people think blockchain is the same thing as cryptocurrencies The opposite is true Blockchain is the underlying technology behind cryptocurrencies but its uses extend well beyond that Blockchains may be considered for use in situations requiring the validation auditing or exchange of data Here we survey the literature on integrating blockchain with machine learning and show that the two may work together successfully and efficiently Machine learning is an umbrella word that includes a wide range of techniques such as traditional ML DL and RL As a distributed and append only ledger system the blockchain is a natural instrument for sharing and processing large data from multiple sources thanks to the inclusion of smart contracts which is a crucial component of the infrastructure necessary for big data analysis When it comes to training and testing machine learning models blockchain can keep data secure and promote data exchange In addition it paves the way for the creation of timely prediction models using several data sources by leveraging distributed computing resources like IoT This is crucial for deep learning processes which need a lot of processing time However distributed systems are more difficult to monitor and regulate than centralized ones and blockchain systems will create a massive quantity of data from a variety of sources The best blockchain mechanism designs need accurate data analysis and predictions of system behaviors Data verification as well as the detection of harmful assaults and dishonest transactions on the blockchain may be aided by machine learning There is a lot to gain from studying how to merge the two technologies from different perspectives

Political Communication Online Ognyan Seizov,2014-04-24 The impact of the Internet on political communication has

been significant and multifaceted it expanded the reach of political messages opened the floodgates of decontextualization and intercultural misunderstanding made room for new genres and forms and allowed for the incorporation of every previously existing communication mode into complex multilayered documents Political Communication Online places these developments in their social and media context covers various disciplinary backgrounds and how they can contribute to a common understanding of the evolving online media landscape and proposes a novel methodological tool for the analysis of political communication online Seizov offers an approach that places context at the core of the theoretical and methodological discussion by discussing the traits of online communication that make it a unique communication environment The book then brings together different disciplines which have important contributions for the study of political communication online but have not been integrated for this purpose so far such as visual communication multimodal research and cognitive psychology Seizov introduces the book's main theoretical and methodological contribution to multimodal document analysis the annotation scheme Imagery and Communication in Online Narratives ICON and explores how the ICON approach works in practice Taking four distinct genres of online political communication news election campaigns NGOs and social movements the book presents the analyses of convenience samples from each of them in detail This text features a comprehensive theoretical discussion of vital current developments in online political communication places these developments in context and couples that with a practical demonstration of the novel methodology it proposes
