Social Media and Political Participation in Vietnam Viet Tho Le,Tuong-Minh Ly-Le,Lam Ha,2024-12-21 This book explores the nexus between social media use among young people and political participation in Vietnam which presents a novel case example for examining whether social media can expand the public sphere to become involved in everyday politics With an estimated 72 million Vietnamese on Facebook the country is the seventh largest user base in the world This social media platform alone has created a virtual public sphere outside of and beyond the scope of the ruling Communist Party and its state owned media outlets The authors analyse the paradox of a complicated balancing act of digital participation in an authoritarian state promoting a new understanding of social media in non Western societies The book generates a considerable body of empirical findings relating to political engagement amongst the youth in the digital age and develops the theory of the public sphere beyond Habermas within this context In its examination of the role of social media in society and in political
