Popović, Rainer Kulms, 2024-10-08 Online platforms and their ecosystems are the cornerstone of the digital economy They have brought forth positive network effects But they are also known for their

information asymmetries their potential for market failures and their problematic relationship with data protection law This volume provides a detailed analysis of the current process of repositioning online platforms in the digital economy as regulators express concerns about the evolution from mere intermediaries to gatekeepers The exclusive reliance on competition law instruments has proven to be incapable of coping with cases of platforms abusing their market power Therefore the book explores the European Union's new approach to digital markets consisting in the adoption or drafting of new legislative instruments such as the Digital Markets Act Digital Services Act Proposal of AI Act Proposal of Data Act Proposal of Data Governance Act The EU's emphasis on new regulatory ex ante instruments as in the Digital Markets Act calls for an assessment of their overlap or their interface with existing supranational and national competition rules The book transcends mere competition law thinking by exploring the status of online platforms from the perspective of trade law rules unfair competition law data protection rules and intellectual property law But in view of the global reach of online platforms the risks of a jurisdiction wise approach with conflicting regulatory strategies are all too clear The volume therefore includes comparative studies on Australia and the USA The potential impact of regulatory policy choices will also be assessed from the economic perspective The book's message is not to be confined to researchers and academics It is also of great importance to practitioners in the digital sector who stand to benefit from the analysis of the law of online platforms undertaken by a working group of renowned authors coming from different jurisdictions

A Leader's Guide to Cybersecurity Thomas J. Parenty, Jack J. Domet, 2019-12-03 Cybersecurity threats are on the rise As a leader you need to be prepared to keep your organization safe Companies are investing an unprecedented amount of money to keep their data and assets safe yet cyberattacks are on the rise and the problem is worsening No amount of technology resources or policies will reverse this trend Only sound governance originating with the board can turn the tide Protection against cyberattacks can't be treated as a problem solely belonging to an IT or cybersecurity department It needs to cast a wide and impenetrable net that covers everything an organization does from its business operations models and strategies to its products and intellectual property And boards are in the best position to oversee the needed changes to strategy and hold their companies accountable Not surprisingly many boards aren't prepared to assume this responsibility In A Leader's Guide to Cybersecurity Thomas Parenty and Jack Domet who have spent over three decades in the field present a timely clear eyed and actionable framework that will empower senior executives and board members to become stewards of their companies cybersecurity activities This includes Understanding cyber risks and how best to control them Planning and preparing for a crisis and leading in its aftermath Making cybersecurity a companywide initiative and responsibility Drawing attention to the nontechnical dynamics that influence the effectiveness of cybersecurity measures Aligning the board executive leadership and cybersecurity teams on priorities Filled with tools best practices and strategies A Leader's Guide to Cybersecurity will help boards navigate this seemingly daunting but extremely necessary transition
