skills and proposes what some of those skills should be A critique of the extreme ethnocentric approach to education in the United States Left Behind advocates strong instruction in the Humanities and foreign languages and the establishment of education abroad as a permanent program in high school and university The author identifies Capitalism as the basic influence that in the form of employing business model constructs has slowly transformed our children into obedient consumers Physical Education has waned and become a major contributor to adolescent obesity Seeking to replace children's complacency with critical thinking instruction the author demonstrates how the corporate mass media occupy their minds He also fears the erosion of the profession of teaching by an online instruction frenzy The book explores the possibilities for a viable nation wide education institution in which decision making is in the hands of teachers parents and education experts instead of politicians and business people The remedies that could be taken up by ordinary people are accessible at the commonsense level what prevents change are the lack of political will and economic greed bolstered by the ideological power of the mass media
