Concert Tickets Today:

The Concert Ticket Olga Grushin, 2010-03-25 On any given morning on the street corners of a Russian city little kiosks suddenly appear As soon as their shutters open a queue forms men and women lining up in the hope of a little bit of luxury a pair of silk stockings or a box of chocolates One morning news spreads that the exiled composer Selinsky will be returning to the city for one concert only and there is one kiosk somewhere selling tickets to this most magical event of the year So begins the story of a family in which a ticket to Selinsky's concert means everything for Sergei the father it holds the promise of an affair with another woman for his wife Anna it offers the hope of winning back her faithless husband for their son Alexander it means the possibility of escaping to the West The Concert Ticket is a fabulously told story of love longing and escape of beauty in a world of repression and of a family at the mercy of each other and the times in which they live **Effective**

Altruism Hilary Greaves, Theron Pummer, 2019-09-12 This is the first collective study of the thinking behind the effective altruism movement This movement comprises a growing global community of people who organise significant parts of their lives around the two key concepts represented in its name Altruism is the idea that if we use a significant portion of the resources in our possession whether money time or talents with a view to helping others then we can improve the world considerably When we do put such resources to altruistic use it is crucial to focus on how much good this or that intervention is reasonably expected to do per unit of resource expended as a gauge of effectiveness We can try to rank various possible actions against each other to establish which will do the most good with the resources expended Thus we could aim to rank various possible kinds of action to alleviate poverty against one another or against actions aimed at very different types of outcome focused perhaps on animal welfare or future generations The scale and organisation of the effective altruism movement encourage careful dialogue on questions that have perhaps long been there throwing them into new and sharper relief and giving rise to previously unnoticed questions In this volume a team of internationally recognised philosophers economists and political theorists present refined and in depth explorations of issues that arise once one takes seriously the twin ideas of altruistic commitment and effectiveness **Sharing**

Matthew David, 2017-09-05 Today's economic system premised on the sale of physical goods does not fit the information age in which we live The capitalist order requires the maintenance of an artificial scarcity in goods that have the potential for near infinite and almost free replication The sharing of informational goods through distributed global networks digital libraries file sharing live streaming free software free access publishing the free sharing of scientific knowledge and open source pharmaceuticals not only challenges the dominance of a scarcity based economic system but also enables a more efficient innovative just and free culture In a series of seven explorations of contemporary sharing Matthew David shows that in each case sharing surpasses markets private ownership and intellectual property rights in fostering motivation creativity innovation production distribution and reward In transforming the idea of an information economy into an information society sharing connects struggles against inequality

and poverty in developed and developing countries Challenging taken for granted justifications of the status quo Sharing debunks the tragedy of the commons and makes the case for digital network sharing as a viable mode of economic counterpower prefiguring a post capitalist society
