Withdrawing and Withholding Treatments Liam Strand,2025-04-16 When medical treatments are not deemed cost effective given considerations of e g needs and severity and therefore denied reimbursement the treatment is commonly withheld from all future patients However should the treatment also be withdrawn from patients who have gained early access to it Previous normative analyses and clinical guidelines suggest that treatments should be equally rationed by both withdrawing and withholding but empirical studies and policy practices indicate that withholding is more acceptable than withdrawing It has been suggested that psychological difficulties associated with withdrawing cause this discrepancy but this remains a hypothesis rather than an experimentally tested explanation The overall aim of the thesis is to explore ethical and psychological aspects of withdrawing treatments in relation to cost effectiveness given that withholding is justified In addition there is an ambition to formulate ethically justified reimbursement recommendations that account for

psychological factors in human judgement and decision making The specific research questions are What are physicians and patient organisation representatives experiences and perceptions of withdrawing and withholding treatments in rationing situations due to relative scarcity Paper I To what extent do people express an ethical difference between withdrawing and withholding treatments in reimbursement decisions Papers II III How do different possibly morally relevant circumstances shape support for rationing by withdrawing and withholding Papers II III What could be a balanced and justified approach to withdrawing and withholding treatments in healthcare priority setting Paper IV In Paper I an interview study was conducted with physicians and patient organisation representatives In Papers II and III two experiments tested differences in acceptance of rationing treatments by withdrawing and withholding In addition Paper II presents the importance of decision level policy or bedside while Paper III presents the importance of different potentially morally relevant circumstances previously identified in Paper I Paper IV presents a normative analysis using a reflective equilibrium process to formulate balanced and justified recommendations on how to withdraw and withhold treatments in reimbursement decisions Paper I showed nuanced perceptions of withdrawing and withholding treatments In some respects the two rationing types were deemed ethically equivalent while in other respects they were considered ethically inequivalent Paper II found that 18% of participants accepted withdrawing treatments at the policy level compared to 29% acceptance for withholding treatments at the policy level and 25% acceptance for withdrawing treatments at the bedside level Paper III found no general difference in acceptance between withdrawing and withholding treatments However differences emerged when analysing specific circumstances where withholding was viewed as more problematic than withdrawing in four out of eleven circumstances Across Papers II and III the overall support for rationing was low Paper IV analysed the ethical acceptability of withdrawing treatments given that withholding is acceptable as well as the ethical acceptability of providing patients with early access to treatments nanced by the healthcare system It is suggested that withdrawing treatments is ethically acceptable but when patients are granted early access a practice where physicians inform patients that the treatment will be withdrawn if it does not get reimbursed is required The main conclusions of the thesis can be summarised as follows In some respects treatment withdrawal is deemed as ethically equivalent to withholding while in other aspects it is deemed as ethically more problematic Paper I When presented with a detailed vignette of the rationing situation people express withdrawing to be less acceptable than withholding Paper II However when presented with short and concise statements no general difference is perceived Paper III Withdrawing is deemed more acceptable at the bedside level than at the policy level Paper II However different circumstances can render withholding equally and sometimes even more unacceptable than withdrawing Paper III An ethically balanced and justified approach to withdrawing and withholding treatments is that if withholding is acceptable then withdrawing is too early access is in principle problematic but if early access is to be given physicians must inform patients that the treatment will be withdrawn if it does not get reimbursed Paper IV N r medicinska behandlingar inte bed ms vara

kostnadseffektiva givet att bedömningen exempelvis tagit hänsyn till behov och svårighetsgrad och därmed nekades ersättning så
tills vanligtvis inte behandlingen inför framtida patienter. Både behandlingen därav avslutas för patienter som fått tidig tillgång till
den. Tidigare normativa analyser och kliniska riktlinjer föreslår att behandlingar ska avslutas och inte startas in på ett likvärdigt sätt.
Däremot visar empiriska studier och policypraxis att det är mer accepterat att inte starta in behandlingar än att avsluta dem. En
mångfald av förklaringar att de psykologiska svårigheterna med att avsluta behandlingar orsakar denna skillnad men inte heller detta
bara en hypotes och inte en experimentellt testad förklaring. Syftet med avhandlingen är att utforska etiska och psykologiska
aspekter kring att avsluta och inte starta in behandlingar i relation till kostnadseffektivitet givet att det är acceptabelt att inte
starta in behandling. Det finns även en ambition om att formulera etiskt och tydliga rekommendationer vid ersättningsbeslut som tar
hänsyn till psykologiska faktorer i ett medvetet och beslutsfattande. De specifika forskningsfrågorna är: Vad är läkarens och
patientorganisationsrepresentanters erfarenheter av och uppfattningar om att avsluta och inte starta in behandlingar i
ransoneringsbeslut kopplade till relativ knapphet. Delstudie I: Vilken utsträckning uttrycker folk en etisk skillnad mellan att
avsluta och inte starta in behandlingar i ersättningsbeslut. Delstudier II och III: Hur påverkar olika potentiellt moraliskt relevant
omständigheter såsom för att ransonera genom att avsluta och inte starta in. Delstudier II och III: Vad skulle vara ett balanserat och
tydligt tillvägagångssätt att avsluta och inte starta in behandlingar inom hälso- och sjukvårdsprioriteringar. Delstudie IV: I
Delstudie I genomfördes en intervjustudie med läkare och patientorganisationsrepresentanter. I Delstudie II och III genomfördes
två experimentella studier som testade skillnader i acceptans för att ransonera behandlingar genom att avsluta och inte
starta in. Delstudie II undersökte även vikten av beslutsnivå, policy eller patientnära medan Delstudie III undersökte vikten av olika
potentiellt moraliskt relevanta omständigheter som tidigare identifierats i Delstudie I. I Delstudie IV genomfördes en normativ
analys genom att använda sig av en reflektivt ekvilibrium process för att formulera rekommendationer om att avsluta och inte
starta in behandlingar i samband med ersättningsbeslut. Delstudie I visade nyanserade uppfattningar om att avsluta och inte
starta in behandlingar i vissa aspekter såsom de två sätten att ransonera behandlingar som etiskt likvärdiga medan i andra aspekter
såsom de som etiskt olikvärdiga. Delstudie II visade att 18% ansåg det acceptabelt att avsluta behandlingar på policynivå jämfört
med 29% som accepterade att inte starta in behandlingar på policynivå och 25% som accepterade att avsluta behandlingar på en
patientnära nivå. Delstudie III visade ingen generell skillnad i acceptans mellan att avsluta och inte starta in behandlingar. Däremot
framkom det skillnader när specifika omständigheter analyserades där att inte starta in såsom som mer problematiskt än att
avsluta under fyra av elva omständigheter. Genom Delstudie II och III var det generella sättet för ransoneringslag Delstudie IV
analyserade den etiska acceptansen av att avsluta behandlingar givet att det är acceptabelt att inte starta in. Studien undersökte
också den etiska acceptansen av att ge patienter tidig tillgång till behandlingar som nansieras av hälso- och sjukvårdssystemet.
Det föreslås att avsluta behandlingar är etiskt acceptabelt men inte patienter för tidig tillgång behövs även en praktik där läkaren
informerar patienten om att behandlingen kommer att avslutas om behandlingen för ett negativt ersättningsbeslut.

Avhandlingens huvudslutsatser kan sammanfattas som I vissa aspekter ses avslut och inte s tta in som etiskt likv rdiga medan i andra aspekter ses avslut som etiskt mer problematiskt Delstudie I N r folk r presenterade f r en vinjett som beskriver en ransoneringssituation uttrycker de att avsluta r mindre acceptabelt n att inte s tta in Delstudie II N r folk r presenterade f r korta och koncisa p st enden uttrycker de ingen generell skillnad Delstudie III Att avsluta behandlingar r mer acceptabelt p en patientn ra niv n p policyniv n Delstudie II D remot under vissa omst ndigheter kan inte s tta in vara likv rdigt och ibland ven mer oacceptabelt n att avsluta Delstudie III Ett etiskt balanserat och r ttf rdigat tillv gag ngss tt att avsluta och inte s tta in behandlingar r om inte s tta in r acceptabelt s r avsluta ocks det tidig tillg ng r i princip problematiskt men om tidig tillg ng ska ges m ste l karen informera patienter om att behandlingen kommer att avslutas om den f r ett negativt ers ttningsbeslut Delstudie IV
