Grimes, 2021-07-30 *Digital Playgrounds* explores the key developments trends debates and controversies that have shaped children's commercial digital play spaces over the past two decades It argues that children's online playgrounds virtual worlds and connected games are much more than mere sources of fun and diversion they serve as the sites of complex negotiations of power between children parents developers politicians and other actors with a stake in determining what how and where children's play unfolds Through an innovative transdisciplinary framework combining science and technology studies critical communication studies and children's cultural studies *Digital Playgrounds* focuses on the contents and contexts of actual technological artefacts as a necessary entry point for understanding the meanings and politics of children's digital play The discussion draws on several research studies on a wide range of digital playgrounds

designed and marketed to children aged six to twelve years revealing how various problematic tendencies prevent most digital play spaces from effectively supporting children's culture rights and ironically play Digital Playgrounds lays the groundwork for a critical reconsideration of how existing approaches might be used in the development of new regulation as well as best practices for the industries involved in making children's digital play spaces In so doing it argues that children's online play spaces be reimagined as a crucial new form of public sphere in which children's rights and digital citizenship must be prioritized
