Netflix Usa Store Hours:

Videoland Daniel Herbert, 2014-01-24 Videoland offers a comprehensive view of the tangible phase of consumer video when Americans largely accessed movies as material commodities at video rental stores. Video stores served as a vital locus of movie culture from the early 1980s until the early 2000s, changing the way Americans socialized around movies and collectively made movies meaningful. When films became tangible as magnetic tapes and plastic discs, movie culture flowed out from the theater and the living room entered the public retail space and became conflated with shopping and salesmanship. In this process, video stores served as a crucial embodiment of movie culture's historical move toward increased flexibility, adaptability, and customization. In addition to charting the historical rise and fall of the rental industry, Herbert explores the architectural design of video stores, the social dynamics of retail encounters, the video distribution industry, the proliferation of video recommendation guides, and the often surprising persistence of the video store as an adaptable social space of consumer culture. Drawing on ethnographic fieldwork, cultural geography, and archival research, Videoland provides a wide-ranging exploration of the pivotal role video stores played in the history of motion pictures and is a must-read for students and scholars of media history.

Matchmakers David S. Evans, Richard Schmalensee, 2016-05-03 A different kind of matchmaker Many of the most dynamic public companies from Alibaba to Facebook to Visa and the most valuable start ups such as Airbnb and Uber are matchmakers that connect one group of customers with another group of customers Economists call matchmakers multisided platforms because they provide physical or virtual platforms for multiple groups to get together Dating sites connect people with potential matches for example and ride sharing apps do the same for drivers and riders Although matchmakers have been around for millennia they re becoming more and more popular and profitable due to dramatic advances in technology and a lot of companies that have managed to crack the code of this business model have become today s power brokers Don t let the flashy successes fool you though Starting a matchmaker is one of the toughest business challenges and almost everyone who tries to build one fails In Matchmakers David Evans and Richard Schmalensee two economists who were among the first to analyze multisided platforms and discover their principles and who ve consulted for some of the most successful platform businesses in the

Post-TV Michael Strangelove,2015-03-27 In the late 2000s television no longer referred to an object to be watched it had transformed into content to be streamed downloaded and shared Tens of millions of viewers have cut the cord abandoned cable television tuned into online services like Netflix Hulu and YouTube and also watch pirated movies and programmes at an unprecedented rate The idea that the Internet will devastate the television and film industry in the same way that it gutted the music industry no longer seems farfetched The television industry however remains driven by outmoded market based business models that ignore audience behaviour and preferences In Post TV Michael Strangelove explores the viewing habits and values of the post television generation one that finds new ways to exploit technology to find its entertainment for free rather than for a fee Challenging the notion that the audience is constrained by regulatory and industrial regimes Strangelove argues that cord cutting digital piracy increased competition and new modes of production and distribution are making audiences and content more difficult to control opening up the possibility of a freer more democratic media environment A follow up to the award winning Watching YouTube Post TV is a lively examination of the social and economic implications of a world where people can watch what they want when they want wherever they want
