Asian Sources Telecom Products, 2004 **Internetworking** Christoph Meinel, Harald Sack, 2013-10-16 This book is supposed to serve as a comprehensive and instructive guide through the new world of digital communication On the physical layer optical and electrical cabling technology are described as well as wireless communication technologies On the data link layer local area networks LANs are introduced together with the most popular LAN technologies such as Ethernet Token Ring FDDI and ATM as well as wireless LAN technologies including IEEE 802.x Bluetooth or ZigBee A wide range of WAN technologies are covered including contemporary high speed technologies like PDH and SDH up to high speed wireless WANs WiMAX and 4th generation wireless telephone networks LTE Routing technologies conclude the treatment of the data link layer Next there is the Internet layer with the Internet protocol IP that establishes a virtual uniform network out of the net of heterogeneous networks In detail both versions IPv4 as well as the successor IPv6 are covered in detail as well as ICMP NDP and Mobile IP In the subsequent transport layer protocol functions are provided to offer a connection oriented and reliable transport service on the basis of the simple and unreliable IP The basic protocols TCP and UDP are introduced as well as NAT the network address translation Beside transport layer security protocols like SSL and TLS are presented On the upmost application layer popular Internet application protocols are described like DNS SMTP PGP S FTP NFS SSH DHCP SNMP RTP RTCP RTSP and World Wide Web

Data Networks, IP and the Internet Martin P. Clark, 2003-05-07 Data Networking is a capability that allows users to combine separate data bases telecommunication systems and specialised computer operations into a single integrated system so that data communication can be handled as easily as voice messages Data communications is the problem of getting information from one place to another reliably secure both from channel

disruptions and deliberate interference while conforming to user requirements IP Internet protocol is the central pillar of the Internet and was designed primarily for internetworking as being a simple protocol almost any network could carry The business world appears to increasingly revolve around data communications and the Internet and all modern data networks are based around either the Internet or at least around IP Internet Protocol based networks However many people still remain baffled by multiprotocol networks how do all the protocols fit together How do I build a network What sort of problems should I expect This volume is intended not only for network designers and practitioners who for too long have been baffled by the complex jargon of data networks but also for the newcomer eager to put the plethora of protocols into context After the initial boom the rate of IP development is now beginning to stabilise making a standard textbook and reference book worthwhile with a longer shelf life Highly illustrated and written in an accessible style this book is intended to provide a complete foundation textbook and reference of modern IP based data networking avoiding explanation of defunct principles that litter other books Network IP engineers Network operators engineering managers and senior undergraduate students will all find this invaluable
