Transdisciplinary Multispectral Modeling and Cooperation for the Preservation of Cultural Heritage Antonia Moropoulou, Andreas Georgopoulos, Marinios Ioannides, Anastasios Doulamis, Kyriakos Lampropoulos, Alfredo Ronchi, 2023-09-02 This volume constitutes selected and revised papers presented during the Third International Conference on Transdisciplinary Multispectral Modelling and Cooperation for the Preservation of Cultural Heritage TMM_CH 2023 held in Athens Greece in March 2023 The 17 full papers and 17 short papers presented in this volume were thoroughly reviewed and selected from 416 submissions The papers are organized in topical sections on scientific innovations in the diagnosis and preservation of cultural heritage digital heritage a holistic approach preservation

reuse and reveal of cultural heritage through sustainable bidding and land management rural and urban development to recapture the world in crisis through culture **Computer Processing of Remotely-Sensed Images** Paul M.

Mather, Magaly Koch, 2022-04-11 Computer Processing of Remotely Sensed Images A thorough introduction to computer processing of remotely sensed images processing methods and applications Remote sensing is a crucial form of measurement that allows for the gauging of an object or space without direct physical contact allowing for the assessment and recording of a target under conditions which would normally render access difficult or impossible This is done through the analysis and interpretation of electromagnetic radiation EMR that is reflected or emitted by an object surveyed and recorded by an observer or instrument that is not in contact with the target This methodology is particularly of importance in Earth observation by remote sensing wherein airborne or satellite borne instruments of EMR provide data on the planet's land seas ice and atmosphere This permits scientists to establish relationships between the measurements and the nature and distribution of phenomena on the Earth's surface or within the atmosphere Still relying on a visual and conceptual approach to the material the fifth edition of this successful textbook provides students with methods of computer processing of remotely sensed data and introduces them to environmental applications which make use of remotely sensed images The new edition's content has been rearranged to be more clearly focused on image processing methods and applications in remote sensing with new examples including material on the Copernicus missions microsatellites and recently launched SAR satellites as well as time series analysis methods The fifth edition of Computer Processing of Remotely Sensed Images also contains A cohesive presentation of the fundamental components of Earth observation remote sensing that is easy to understand and highly digestible Largely non technical language providing insights into more advanced topics that may be too difficult for a non mathematician to understand Illustrations and example boxes throughout the book to illustrate concepts as well as revised examples that reflect the latest information References and links to the most up to date online and open access sources used by students Computer Processing of Remotely Sensed Images is a highly insightful textbook for advanced undergraduates and postgraduate students taking courses in remote sensing and GIS in Geography Geology and Earth Environmental Science departments **Nursing Informatics** Ursula H. Hübner, Gabriela Mustata Wilson, Toria

Shaw Morawski, Marion J. Ball, 2022-07-25 This new edition of the classic textbook on health informatics provides readers in healthcare practice and educational settings with an unparalleled depth of information on using informatics methods and tools However this new text speaks to nurses and in a departure from earlier editions of this title to all health professionals in direct patient care regardless of their specialty extending its usefulness as a textbook This includes physicians therapists pharmacists dieticians and many others In recognition of the evolving digital environments in all healthcare settings and of interprofessional teams the book is designed for a wide spectrum of healthcare professions including quality officers health information managers administrators and executives as well as health information technology professionals such as

engineers and computer scientists in health care The book is of special interest to those who bridge the technical and caring domain particularly nurse and medical informaticians and other informaticians working in the health sciences Nursing Informatics An Interprofessional and Global Perspective contains real life case studies and other didactic features to illustrate the theories and principles discussed making it an ideal resource for use within health and nursing informatics curricula at both undergraduate and graduate level as well as for workforce development It honors the format established by the previous editions by including a content array and questions to guide the reader Readers are invited to look out of the box through a dedicated global perspective covering health informatics applications in different regions countries and continents

Artificial Intelligence and Human Rights Law in Africa Aderomola Adeola, 2025-09-29 This book examines artificial intelligence AI in Africa from a rights based perspective In recent years technology has emerged as a significant disruptor with AI robotics and computer advancement in particular driving changes in societies around the world

There are evident and daunting implications across contexts and continents and many countries are rapidly seeking to define patterns of solutions that can foster effective protection against the more challenging impacts of AI. This book considers the consequences of AI for civil and political rights, social, economic and cultural rights and collective rights in Africa, with particular reference to the African Charter. It considers how AI risks violating the rights enshrined in the Charter and considers how the norms outlined in the African Charter can provide the basis for a response. Overall, this book examines how a rights-based approach to AI can be realized, emphasising the imperatives for steering implementation. Providing an important guide for strategic action for the protection of human rights in the context of AI, this book will be an important read for researchers, policymakers and students in the fields of human rights and technology in Africa.
