system in danger due to its intrinsic flaws and tendency to self destruction The major flaw is that human nature is not adequately considered in democracy s conception its citizens We the people as individuals and as crowds are liberated into a dangerous ideology prioritizing freedom from society over membership in society and thereby causing decline in libertinism hedonism and polarization in divided and finally broken societies Proposals to resolve the rapidly growing crisis include education of citizens into the ethics of reciprocal altruism grounded in evidence from biological sciences and humanities professionalization of politics and a fundamental change of politics towards evidence based decision making thus ending politicking politicians personality affairs and the cold war of political parties the representative of class warfare in the sheep skin of interest group pluralism The author uses his background in human biology and psychology to discuss the relevance of philosophical and politological issues around democracy raised in past and recent literature and to highlight the prospects of using scientific knowledge for evidence based socialization of the human factor **Streaming vs Theaters** Ethan
