Devore, Kenneth N. Berk, 2011-12-07 Modern Mathematical Statistics with Applications Second Edition strikes a balance between mathematical foundations and statistical practice In keeping with the recommendation that every math student should study statistics and probability with an emphasis on data analysis accomplished authors Jay Devore and Kenneth Berk make statistical concepts and methods clear and relevant through careful explanations and a broad range of applications involving real data The main focus of the book is on presenting and illustrating methods of inferential statistics that are useful in research It begins with a chapter on descriptive statistics that immediately exposes the reader to real data The next six chapters develop the probability material that bridges the gap between descriptive and inferential statistics Point estimation inferences based on statistical intervals and hypothesis testing are then introduced in the next three chapters The remainder of the book explores the use of this methodology in a variety of more complex settings This edition includes a plethora of new exercises a number of which are similar to what would be encountered on the actuarial exams that cover probability and statistics Representative applications include investigating whether the average tip percentage in a particular restaurant exceeds the standard 15% considering whether the flavor and aroma of Champagne are affected by bottle temperature or type of pour modeling the relationship between college graduation rate and average SAT score and assessing the likelihood of O ring failure in space shuttle launches as related to launch temperature **Transforming Primary Mathematics** Mike Askew, 2015-11-19 Fully updated

to reflect the new curriculum the revised edition of Transforming Primary Mathematics sets out key theories and cutting edge research in the field to enable teachers to take a fresh look at how they teach mathematics The book encourages teachers to reflect on their own beliefs and values about mathematics and asks them to question whether their current methods meet the needs of all learners and the challenge of having high expectations for all It provides clear practical approaches to help implement fundamental change in classroom environments and offers motivational teaching styles to ensure meaningful mathematics learning Chapters take an inspiring sometimes controversial and often unconventional look at the subject of mathematics by endorsing the use of a new mathematics one based on problem solving modelling inquiry and reasoning not on abstract rules memorising and regurgitation arguing that there is more to maths teaching than death by a thousand worksheets challenging norms such as the practice of sorting children into sets based on their perceived mathematical ability asking whether mathematical ability is innate or a result of social practices examining what a mastery approach might entail highlighting the role of variation in supporting learning advocating an environment where teachers are encouraged to take risks Transforming Primary Mathematics is for all primary school teachers who want to make mathematics welcoming engaging inclusive and successful

Capturing Finance Carolyn Hardin,2021-07-09 Arbitrage the trading practice that involves buying assets in one market at a cheap price and immediately selling them in another market for a profit is fundamental to the practice of financial trading and economic understandings of how financial markets function Because traders complete transactions quickly and use other people s money arbitrage is considered to be riskless Yet despite the rhetoric of riskless trading the arbitrage in mortgage backed securities led to the 2008 financial crisis In Capturing Finance Carolyn Hardin offers a new way of understanding arbitrage as a means for capturing value in financial capitalism She shows how arbitrage relies on a system of abstract domination built around risk The commonsense beliefs that taking on debt is necessary for affording everyday life and that investing is necessary to secure retirement income compel individuals to assume risk while financial institutions

amass profits Hardin insists that mitigating financial capitalism's worst consequences such as perpetuating class and racial inequities requires challenging the narratives that naturalize risk as a necessary element of financial capitalism as well as social life writ large
