Learning Activities and Teaching Ideas for the Special Child in the Regular Classroom Peggy Glazzard, 1982

Resources in Education, 2001 Topics in Mathematics for the Secondary School Owen Craddy, 1967 Elements of Numerical Mathematical Economics with Excel Giovanni Romeo, 2019-11-28

Elements of Numerical Mathematical Economics with Excel Static and Dynamic Optimization shows readers how to apply static and dynamic optimization theory in an easy and practical manner without requiring the mastery of specific programming languages that are often difficult and expensive to learn. Featuring user friendly numerical discrete calculations developed within the Excel worksheets, the book includes key examples and economic applications solved step by step and then replicated in Excel. After introducing the fundamental tools of mathematical economics, the book explores the classical static optimization theory of linear and nonlinear programming, applying the core concepts of microeconomics and some portfolio theory. This provides a background for the more challenging worksheet applications of the dynamic optimization theory. The book also covers special complementary topics such as inventory modelling, data analysis for business and economics, and the essential elements of Monte Carlo analysis. Practical and accessible, Elements of Numerical Mathematical Economics with Excel Static and Dynamic Optimization increases the computing power of economists worldwide. This book is accompanied by a companion website that includes Excel examples presented in the book, exercises, and other supplementary materials that will further assist in understanding this useful framework. Explains how Excel provides a practical numerical approach to optimization theory and analytics. Increases access to the economic applications of this universally available, relatively simple software program. Encourages readers to go to the core of theoretical, continuous calculations and learn more about optimization processes. New Maths in Action S3/3 Teacher Resource Pack Harvey Douglas Brown, 2004-06

This series offers complete coverage of Standard Grade targets in a carefully considered order and is written by authors of New Maths in Action S1 and S2 to ensure progression from 5-14. There are three Teacher Resource Packs available for each year, providing complete support for each of the Student Books. **General Mathematics for the 9th Year** New York (N.Y.). Board of Education, 1950 *Current Index to Journals in Education*, 1997-07 *Mathematics for Social Justice: Resources for the College Classroom* Gizem Karaali, Lily S. Khadjavi, 2019-07-09

Mathematics for Social Justice offers a collection of resources for mathematics faculty interested in incorporating questions of social justice into their classrooms. The book begins with a series of essays from instructors experienced in integrating social justice themes into their pedagogy; these essays contain political and pedagogical motivations as well as nuts and bolts teaching advice. The heart of the book is a collection of fourteen classroom-tested modules featuring ready-to-use activities and investigations for the college mathematics classroom. The mathematical tools and techniques used are relevant to a wide variety of courses, including college algebra, math for the liberal arts, calculus, differential equations, discrete mathematics, geometry, financial mathematics, and combinatorics. The social justice

themes include human trafficking income inequality environmental justice gerrymandering voting methods and access to education The volume editors are leaders of the national movement to include social justice material into mathematics teaching Gizem Karaali is Associate Professor of Mathematics at Pomona College She is one of the founding editors of The Journal of Humanistic Mathematics and an associate editor for The Mathematical Intelligencer and Numeracy she also serves on the editorial board of the MAA's Carus Mathematical Monographs Lily Khadjavi is Associate Professor of Mathematics at Loyola Marymount University and is a past co chair of the Infinite Possibilities Conference She has served on the boards of Building Diversity in Science the Barbara Jordan Bayard Rustin Coalition and the Harvard Gender and Sexuality Caucus
