The Routledge Companion to Public Humanities Scholarship Daniel Fisher-Livne, Michelle May-Curry, 2024-05-31 Across humanities disciplines, public scholarship brings academics and community members and organizations together in mutually beneficial partnership for research, teaching and programming. While the field of publicly engaged humanities scholarship has been growing for some time, there are few volumes that have attempted to define and represent its scope. The Routledge Companion to Public Humanities Scholarship brings together wide-ranging case studies sharing perspectives on this work grounded in its practice in the United States. The collection begins with chapters reflecting on theories and practices of public humanities scholarship. The case studies that follow are organized around six areas of particular impact in public humanities scholarship: Informing contemporary debates, amplifying community voices and histories, helping individuals and communities navigate difficult experiences, preserving culture in times of crisis and change, expanding educational access and building and supporting public scholarship. The Companion concludes with a glossary introducing select concepts. Taken together, these resources offer an overview for students and practitioners of public humanities scholarship, creating an accessible vocabulary rooted in the practices that have so advanced academic and community life. Although drawing on case studies from the US, these examples offer perspectives and insights relevant to public humanities around the world. This book will be of interest to anyone working within the public humanities or wanting to make their work public and engage with wider communities.

categories The respondents from across the U S reflect the diversity of the population but have one thing in common they earn tips A tip is a price set almost entirely by a customer less connected to demand than to social code In the U S tipping remains one of our most controversial confusing and highly variable norms In their own words respondents present their perspectives regarding their compensation as well as what they like and dislike about work Understanding what people think about tipping and how tipped employees experience their work provides an understanding of tipping norms that has never been addressed The evidence in this study indicates that tips do not appear to increase in accordance with inequality and tips do not alleviate the discomfort of inequality from the perspective of the tipped employee when they are given to demonstrate status over another Tips may in some cases serve a redistributive function but they are not consistent with regard to social status The evidence in this study also indicates that tips are a weak signal of quality and are not likely to serve as an effective monitoring mechanism People appear to conform to tipping norms for social and emotional rather than strictly rational reasons Furthermore conformity to tipping norms is likewise inconsistent across work contexts One of the principal mechanisms for fostering conformity lies within the organizational hierarchy and management plays a critical role The definitive difference between those who like their job and those who do not is the experience with people particularly management Every person who interacts with the public encounters people who are rude or disrespectful The critical lesson for management is that the emotional costs of these interactions can be mitigated by managers who extend trust and support to employees The absence of trust in the workplace contributes to a work environment that impose

Higher Education in the Information Age Dennis Everette E.,Craig L. LaMay,2021-09-28 College and university education has long been a material and intellectual luxury in American life Fewer than 38 percent of Americans have ever attended college and only about half that number hold bachelor s degrees While post World War Two legislation greatly democratized higher education the editors of this volume contend that the system has never been a public stewardship Many universities are devoted to private sector research rather than public learning to productivity rather than democratic discourse and because of diminished financial opportunities increasingly exclude poor working and lower middle class students many of them people of color The contributors to this volume recognize that the American system of higher education is the most open and egalitarian in the world Largely for this reason it is the only American institution which today enjoys a positive balance of trade Many more foreign students come to study at American universities than do Americans go

to study abroad The study of higher education in an information age means examining higher education The place of economics in decision making is as a vehicle for social mobility The volume covers a myriad of themes the role of media ranking universities and their contribution to low expectations of universities the disjunction between massive support for college and university sports events and the intellectual and presumed academic missions of these institutions of higher learning and boosterism as a general phenomenon in funding Yet editors and contributors alike emphasize new currents in the educational agenda The essays cover efforts to close the gap between the mutual recriminations of universities and media leaders The theme of this volume is that there is a crisis in higher education and a crisis in knowledge who produces it controls it uses it and benefits by it Properly understood the issues common to both higher education and the media have profound implications for public life This volume is critical of current practices but also mindful that the university remains a place in which civil forms of discourse are central and hence of great potential benefit to the dissemination of information and ideas as such It will be of interest to professional interested in communication and education **New Writing**
