Technology and Aging Alex Mihailidis, Jennifer Boger, Henry Kautz, 2008 This publication presents articles on Aging in Place Assistive Technology Monitoring and Telehealth Transportation and Mobility and Design The section on assistive technology AT represents arguably the most mature and generic aspect of technology and aging except that AT can hardly be regarded really as a specific discipline any longer Assistive devices and systems command an expansive gamut of technological and engineering specialties drawing upon mechanical engineering and industrial design at one end of the field and cybernetic systems engineering and brain computer user interfaces at the other The largest section in the book on monitoring and telehealth reveals novel applications of advanced pattern recognition techniques some of which have up to now found roles primarily in the military process engineering and financial sectors Transportation and mobility still represents by far the largest and most commercially lucrative market segment of technology for seniors There is however a clear trend towards synthesis of information and communication technologies ICT and mobility technologies which is embodied in the latest developments of automatic collision avoidance and full or semi autonomous navigation functions in powered mobility devices The last section is dedicated to design issues It is proposed that designing for the special needs market before making a design as inclusive as possible to the mainstream market is a viable alternative to the currently accepted notion of inclusive design provided that aesthetics are appropriately addressed To conclude we see a social shift from institutional to home based care in which information communication technology based solutions now afford the possibility of aging in place for the many thousands of people having mild to moderate cognitive impairment

Participative Urban Health and Healthy Aging in the Age of AI Hamdi Aloulou, Bessam Abdulrazak, Antoine de Marassé-Enouf, Mounir Mokhtari, 2022-06-21 This open access book constitutes the refereed proceedings of the 18th International Conference on String Processing and Information Retrieval ICOST 2022 held in Paris France in June 2022 The 15 full papers and 10 short papers presented in this volume were carefully reviewed and selected from 33 submissions They cover topics such as design development deployment and evaluation of AI for health smart urban environments assistive

technologies chronic disease management and coaching and health telematics systems **Automated Secure Computing for Next-Generation Systems** Amit Kumar Tyagi, 2023-11-16 AUTOMATED SECURE COMPUTING FOR NEXT GENERATION SYSTEMS This book provides cutting edge chapters on machine empowered solutions for next generation systems for today's society Security is always a primary concern for each application and sector In the last decade many techniques and frameworks have been suggested to improve security data information and network Due to rapid improvements in industry automation however systems need to be secured more quickly and efficiently It is important to explore the best ways to incorporate the suggested solutions to improve their accuracy while reducing their learning cost During implementation the most difficult challenge is determining how to exploit AI and ML algorithms for improved safe service computation while maintaining the user's privacy The robustness of AI and deep learning as well as the reliability and privacy of data is an important part of modern computing It is essential to determine the security issues of using AI to protect systems or ML based automated intelligent systems To enforce them in reality privacy would have to be maintained throughout the implementation process This book presents groundbreaking applications related to artificial intelligence and machine learning for more stable and privacy focused computing By reflecting on the role of machine learning in information cyber and data security Automated Secure Computing for Next Generation Systems outlines recent developments in the security domain with artificial intelligence machine learning and privacy preserving methods and strategies To make computation more secure and confidential the book provides ways to experiment conceptualize and theorize about issues that include AI and machine learning for improved security and preserve privacy in next generation based automated and intelligent systems Hence this book provides a detailed description of the role of AI ML etc in automated and intelligent systems used for solving critical issues in various sectors of modern society Audience Researchers in information technology robotics security privacy preservation and data mining The book is also suitable for postgraduate and upper level undergraduate students Best Life ,2006-06 Best Life magazine empowers men to continually improve their physical emotional and financial well being to better enjoy the most rewarding years of their life **Selling Your House** Ilona Bray, 2021-01-06 Make the real estate market work for you Whether your local real estate market is super heated or sluggish there are steps you can take to reach the right buyers pick the best offer and ultimately get top dollar for your home Selling Your House Nolo's Essential Guide will take you through the process from start to finish And you'll learn how to do it all in the shortest possible time Real estate expert and best selling author Ilona Bray gives you the inside scoop on setting a price that will attract buyers finding the right real estate agent safely opening your home to visitors determining which repairs and upgrades pay off making legally required disclosures to buyers evaluating purchase offers and negotiating and closing escrow successfully Provides tips from industry pros including real estate agents attorneys home stagers and more as well as stories from home sellers The 4th edition also includes changes in industry practices resulting from the COVID 19 pandemic

Natural Language Processing with Python Quantum Technologies LLC, 2025-01-16 Learn NLP with Python through practical exercises advanced topics like transformers and real world projects such as chatbots and dashboards A comprehensive guide for mastering NLP techniques Key Features A comprehensive guide to processing analyzing and modeling human language with Python Real world projects that reinforce NLP concepts including chatbot design and sentiment analysis Foundational and advanced NLP techniques for practical applications in diverse domains Book Description Embark on a comprehensive journey to master natural language processing NLP with Python Begin with foundational concepts like text preprocessing tokenization and key Python libraries such as NLTK spaCy and TextBlob Explore the challenges of text data and gain hands on experience in cleaning tokenizing and building basic NLP pipelines Early chapters provide practical exercises to solidify your understanding of essential techniques Advance to sophisticated topics like feature engineering using Bag of Words TF IDF and embeddings like Word2Vec and BERT Delve into language modeling with RNNs syntax parsing and sentiment analysis learning to apply these techniques in real world scenarios Chapters on topic modeling and text summarization equip you to extract insights from data while transformer based models like BERT take your skills to the next level Each concept is paired with Python based examples ensuring practical mastery The final chapters focus on real world projects such as developing chatbots sentiment analysis dashboards and news aggregators These hands on applications challenge you to design train and deploy robust NLP solutions With its structured approach and practical focus this book equips you to confidently tackle real world NLP challenges and innovate in the field What you will learn Clean and preprocess text data using Python effectively Master tokenization techniques for words sentences and characters Build robust NLP pipelines with feature engineering methods Implement sentiment analysis with machine learning models Perform topic modeling using LDA LSA and other algorithms Develop chatbots and dashboards for real world applications Who this book is for This book is ideal for students researchers and professionals in machine learning data science and artificial intelligence who want to master NLP Beginners will benefit from the step by step introduction to text processing and feature engineering while experienced practitioners can explore advanced topics like transformers and real world projects Basic knowledge of Python and familiarity with programming concepts are recommended to fully utilize the content Enthusiasts with a passion for language technology will also find this guide valuable for building practical NLP applications
