The New Normal: Lefor Joseph Lefor, 2020-10-22 The essence of this book is not to scare individuals or businesses operating on either local national or global scales It is however meant to draw our attention to the fact that certain changes in global business outlook have occurred so fast and these changes have definitely come to stay In effect there undoubtedly needs to be an accompanying paradigm shift in our normal business modules routines and operations if we need to live up with the times Large Multinational corporations are no exception to this Nonetheless startups and SME s need to be keener on digitization and online presence if they wish to scale up operations to national and international levels This book would borrow plenty of events and examples within Europe America and Africa However a wakeup call will mostly be directed towards startups and SMEs in the continent of Africa which are neither showing interest in going digital yet nor are proving active in augmenting their existing digital technologies I spent 22 years of my life in Cameroon a country which is located in West and Central Africa before was later exposed to alternative digital experiences in other parts of the world I thought of warning you ahead just because some of the stories I will share in this book are massively shaped by where I have spent my life the most Let s get straight into it I begin by exposing some realities in Cameroon as to where Startups and SME s are at with regards to digitization and e commerce This would serve as a starting point to the practical realities and theoretical knowledge this book intends to pass across
