Handbook of Distance Education Michael Grahame Moore,William C. Diehl,2018-12-07 The Handbook of Distance Education 4th Edition is a comprehensive compendium of research in the field of distance education The volume is divided into four sections covering the historical and theoretical foundations of distance education attributes of teaching and learning using technology management and administration and different audiences and providers Throughout leading scholars address future research needs and directions based on current research established practices and recent changes to implementation pedagogy and policy **Science** John Michels (Journalist),2011 **Literacy in Teacher Preparation and**

Practice Patrick M. Jenlink,2022-04-01 Today the meaning of literacy what it means to be literate has shifted dramatically Literacy involves more than a set of conventions to be learned either through print or technological formats Rather literacy enables people to negotiate meaning The past decade has witnessed increased attention on multiple literacies and modalities of learning associated with teacher preparation and practice Research recognizes both the increasing cultural and linguistic diversity in the new globalized society and the new variety of text forms from multiple communicative technologies There is also the need for new skills to operate successfully in the changing literate and increasingly diversified social environment

Linguists anthropologists educators and social theorists no longer believe that literacy can be defined as a concrete list of skills that people merely manipulate and use Rather they argue that becoming literate is about what people do with literacy the values people place on various acts and their associated ideologies In other words literacy is more than linguistic it is political and social practice that limits or creates possibilities for who people become as literate beings Such understandings of literacy have informed and continue to inform our work with teachers who take a sociological or critical perspective toward literacy instruction Importantly as research indicates the disciplines pose specialized and unique literacy demands Disciplinary literacy refers to the idea that we should teach the specialized ways of reading understanding and thinking used in each academic discipline such as science mathematics engineering history or literature Each field has its own ways of using text to create and communicate meaning Accordingly as children advance through school literacy instruction should shift from general literacy strategies to the more specific or specialized ones from each discipline Teacher preparation programs emphasizing different disciplinary literacies acknowledge that old approaches to literacy are no longer sufficient

Literacy in Teacher Preparation and Practice Enabling Individuals to Negotiate Meaning introduces the reader to a collection of thoughtful research based works by authors that represent current thinking about literacy across disciplines and the preparation of teachers to enter classrooms Each chapter focuses on teaching guided by literacies across disciplines and the preparation of teachers who will enter classrooms to instruct the next generation of students

Teaching Mathematics in the Visible Learning Classroom, Grades 3-5 John Almarode, Douglas Fisher, Kateri Thunder, Sara Delano Moore, John Hattie, Nancy Frey, 2019-02-13 It could happen in the morning during homework review Or perhaps it happens when listening to students as they struggle through a challenging problem Or maybe even after class when planning a lesson At some point the question arises How do I influence students learning what s going to generate that light bulb aha moment of understanding In this sequel to the megawatt best seller Visible Learning for Mathematics John Almarode Douglas Fisher Nancy Frey John Hattie and Kateri Thunder help you answer that question by showing how Visible Learning strategies look in action in the mathematics classroom Walk in the shoes of elementary school teachers as they engage in the 200 micro decisions per minute needed to balance the strategies tasks and assessments seminal to high impact mathematics instruction Using grade leveled examples and a decision making matrix you ll learn to Articulate clear learning intentions and success criteria at surface deep and transfer levels Employ evidence to guide students along the path of becoming metacognitive and self directed mathematics achievers Use formative assessments to track what students understand what they don t and why Select the right task for the conceptual procedural or application emphasis you want ensuring the task is for the right phase of learning Adjust the difficulty and complexity of any task to meet the needs of all learners It s not only what works but when Exemplary lessons video clips and online resources help you leverage the most effective teaching practices at the most effective time to meet the surface deep and transfer learning needs of every student
