Artificial Intelligence and Intellectual Property Jyh-An Lee, Reto Hilty, Kung-Chung Liu, 2021-02-25 Artificial Intelligence AI has become omnipresent in today's business environment from chatbots to healthcare services to various ways of creating useful information. While AI has been increasingly used to optimize various creative and innovative processes, the integration of AI into products, services, and other operational procedures raises significant concerns across virtually all areas of intellectual property (IP) law. While AI has drawn extensive attention from IP experts globally, this is the first book providing a broad and comprehensive picture from the perspectives of the very nature of AI technology, its commercial implications, its interaction with different kinds of IP, IP administration software and data, its social and economic impact on the innovation policy, and ultimately AI's eligibility as a legal entity. **Data Protection, Privacy and Artificial Intelligence, Volume 17** Eleni Kosta, Dara Hallinan, Paul De Hert, Suzanne Nusselder, 2025-05-01 This book examines the discourse and developments surrounding privacy and data protection in the digital realm, featuring papers and discussions from the 2024 CPDP AI international conference. The question of governance, whether to lead or be led, has never been more relevant. Thus, the book not only addresses privacy and data protection but also highlights issues related to the governance of artificial intelligence and the regulatory changes introduced by the EU AI Act. The book features comprehensive discussions on the adequacy and effectiveness of the governance mechanisms established by the EU AI Act, particularly emphasising standardisation, co-regulation, and human oversight, while also identifying existing gaps in protection. Additionally, it pays special attention to the risks to fundamental rights associated with AI usage by law enforcement agencies, examining whether the current legal framework sufficiently safeguards against these risks. Finally, the book provides an in-depth exploration of deepnude and deepfake technology that generates nude images, as well as the role of AI in the EU's migration management systems. The chapters in this book provide readers with an opportunity to explore the challenges and developments related to privacy, data protection, and artificial intelligence. By presenting academic insights alongside contributions from practitioners, civil society, and the European Data Protection Supervisor, this interdisciplinary volume encapsulates the essence of the CPDP AI 2024 conference. *Advanced Methods, Equipment and Platforms in Precision Field Crops Protection, volume II* Jun Ni, Peter Yuen, Jingcheng Zhang, Ning Yang, 2025-11-05 Diseases, pests, and weeds have severely affected the production of crops. Traditional agriculture solves the above problems by large-scale chemical spraying, but excessive pesticides can also seriously affect the growth of crops and pollute the environment. Therefore, it is necessary to use modern technologies to protect field crops accurately. Collect and analyze the characteristics and location information of diseases, pests, and weeds as early as possible with equipment and methods, and use various platforms to complete the precise protection of field crops. This Research Topic welcomes submissions that address precision crop protection research and demonstrate how smart control strategies, sensor technology, and operational platforms can be integrated into actual crop protection. We welcome

submissions of original research articles reviews and methods including but not limited to research on the following sub themes 1 Real time monitoring and detection sensors for diseases pests and weeds 2 Intelligent crop protection methods based on artificial intelligence 3 Phenotypic parameter analysis of weeds and affected crops 4 Precision variable rate equipment and system for crop protection 5 Digital twin models novel IoT technologies and cloud platform for crop protection 6 Advances innovations and new trends in modern technologies for crop protection and development

Crypto-Finance, Law and Regulation Joseph Lee, 2022-02-17 Crypto Finance Law and Regulation investigates whether crypto finance will cause a paradigm shift in regulation from a centralised model to a model based on distributed consensus. This book explores the emergence of a decentralised and disintermediated crypto market and investigates the way in which it can transform the financial markets. It examines three components of the financial market: technology, finance, and the law, and shows how their interrelationship dictates the structure of a crypto market. It focuses on regulators' enforcement policies and their jurisdiction over crypto finance operators and participants. The book also discusses the latest developments in crypto finance and the advantages and disadvantages of crypto currency as an alternative payment product. It also investigates how such a decentralised crypto finance system can provide access to finance, promote a shared economy, and allow access to justice. By exploring the law, regulation, and governance of crypto finance from a national, regional, and global viewpoint, the book provides a fascinating and comprehensive overview of this important topic and will appeal to students, scholars, and practitioners interested in regulation, finance, and the law. *The Harmonization and Protection of Trade*

Artificial intelligence in nuclear safety and radiation protection Elvira Romera, 2025-07-21 Artificial Intelligence (AI) is increasingly recognized as a transformative tool in the field of radiation and nuclear safety. This technology offers significant opportunities to enhance the safety, security, efficiency, and reliability of nuclear facilities and radiation-related operations. The book contains chapters that describe general topics about different radiation and nuclear safety applications of AI technology in radiation and nuclear endeavours and facilities as follows: i) ethical aspects of radiation and nuclear safety and their relationship with AI; ii) AI and radiation protection; iii) AI and the challenges to nuclear safety, as well as a set of more specific chapters: v) Artificial intelligence and radiation protection in medical applications (diagnosis and therapy); vi) AI for radiation protection in the decommissioning of radiation and nuclear facilities; and vii) innovation in the role of AI for regulatory document management. The adoption of AI will also require significant regulatory updates and workforce training to keep pace with technological advancements. As AI applications expand both in predictable and unforeseen ways, regulatory bodies must adapt to ensure ongoing compliance and safety assurance. Continued collaboration among AI developers, nuclear safety experts, and regulatory authorities will be critical. With the right safeguards, AI has the potential to significantly transform the radiation and nuclear industries by providing safer, more efficient, and more effective solutions. *Consumer Protection*
