Social Media in South India Shriram Venkatraman, 2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu Social Media in South India provides an understanding of this subject in a region experiencing rapid transformation The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life While certain class tensions have emerged in response to this juxtaposition a study of social media in the region suggests that similarities have also transpired observed most clearly in the blurring of boundaries between work and life for both the old residents and the new Venkatraman explores the impact of social media at home work and school and analyses the influence of class caste age and gender on how and which social media platforms are used in different contexts These factors he argues have a significant effect on social media use suggesting that social media in South India while seeming to induce societal change actually remains bound by local traditions and practices

Akzeptanz von Sprachassistenten zur Steuerung vernetzter Geräte im Smart Home Fabian Sueße, 2018-03-13 Masterarbeit aus dem Jahr 2017 im Fachbereich Medien Kommunikation Multimedia Internet neue Technologien Note 1,5 FOM Hochschule für Oekonomie und Management gemeinnützige GmbH Hochschulstudienzentrum Hamburg Sprache Deutsch Abstract Viele Menschen sind technischen Innovationen gegenüber positiv eingestellt In dieser Arbeit wird die Akzeptanz der Sprachassistenten zur Steuerung vernetzter Geräte im Smart Home untersucht Es geht darum ein elektronisches intelligentes Gerät das mithelfen und Dinge eigenständig erledigen kann an einem intimen Ort zu installieren Es wirkt fast so

als würde man ein neues Familienmitglied aufnehmen es in vertraute Informationen einweihen und es lernen lassen Mit Blick auf die Cyberkriminalität des 20. Jahrhunderts dürfte dies für den einen oder anderen Nutzer ein Grund sein sich die Sache vorerst aus der Ferne anzusehen Im Wettlauf mit der Konkurrenz nimmt sich kein Anbieter die Zeit auf technische Standards zu warten Aus diesem Grund sind bisher viele Geräte untereinander nicht kompatibel und Hacker haben leichtes Spiel Es bestehen in sich geschlossene Systeme sogenannte Insellösungen Eine weitere Herausforderung für die Entwickler ist der Umgang mit der Akzeptanz der Nutzer Je menschenähnlicher die Geräte werden desto weniger akzeptieren sie das Gerät Forscher beschreiben dieses Phänomen als Uncanny Valley unheimliches Tal Erst wenn die Imitation perfekt ist steigt die Akzeptanz wieder an Dies wiederum erzeugt weitere Herausforderungen denn es besteht die Gefahr dass man von den Geräten zu viel erwartet Wie weit sind die Deutschen wenn es um Sprachassistenten und die Steuerung ihrer heimischen Geräte geht Die Gestaltung eines Sprachassistenten und der Einzug in das private Zuhause sind nicht unbedingt einfach Eine Reihe von Faktoren haben einen direkten oder indirekten positiven oder negativen Einfluss auf die Akzeptanz von Sprachassistenten Für alle beteiligten Unternehmen ist somit die Analyse des Einflusses auf die Akzeptanz von Sprachassistenten der entscheidende Faktor für den Erfolg Des Weiteren stellt sich die Frage ob Unterschiede zwischen stationären und mobilen Sprachassistenten hinsichtlich der Akzeptanzbildung zur Steuerung vernetzter Geräte im Smart Home bestehen

Mobile Tech Report 2014 John R. Roberts, 2014-01-10. If you read technology news, you'll notice it's not just a story of amazing new product introductions or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers, we love the new products and unique abilities we are gaining from technology but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business: who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast.
