Problem of Fit Phillip B. Levine, 2022-04-22 A critical examination of the complex system of college pricing how it works how it fails and how fixing it can help both students and universities How much does it cost to attend college in the United States today The answer is more complex than many realize College websites advertise a sticker price but uncovering the actual price the one after incorporating financial aid can be difficult for students and families This inherent uncertainty leads some students to forgo applying to colleges that would be the best fit for them or even not attend college at all The result is that millions of promising young people may lose out on one of society's greatest opportunities for social mobility Colleges suffer too losing prospective students and seeing lower enrollments and less socioeconomic diversity If markets require prices to function well then the American higher education system rife as it is with ambiguity in its pricing amounts to a market failure In **A Problem of Fit** economist Phillip B Levine explains why institutions charge the prices they do and discusses the role of financial aid systems in facilitating and discouraging access to college Affordability issues are real but price transparency is also part of the problem As Levine makes clear our conversations around affordability and free tuition miss a larger truth that the opacity of our current college financing systems is a primary driver of inequities in education and society In a clear eyed assessment of educational access and aid in a post COVID 19 economy **A Problem of Fit** offers a trenchant new argument for educational reforms that are well within reach **Accreditation on the Edge** Susan D.

Phillips, Kevin Kinser, 2018-06-01 A behind the scenes look at how college and university accreditation affects your education and the value of your degree Accreditation is essential to colleges and universities Without it they are unable to participate in federal student aid programs or confer legitimate degrees In **Accreditation on the Edge** Susan D Phillips and Kevin Kinser bring together the expertise of different stakeholders to illustrate the complexities of the accreditation system and to map the

critical issues that must be navigated going forward Accreditation can be seen both as an invaluable resource and as a barrier to needed reform Presenting an array of different perspectives from accreditors and institutions to policymakers and consumers the book offers nuanced views on accreditation s importance to higher education and on the potential impact of proposed reforms The contributors reveal that accreditation is currently on the edge of a policy precipice as the needs of higher education and the interests of the many stakeholders may well outstrip its ability to perform But they argue accreditation is also on the cutting edge of the transformation of higher education in the twenty first century Intended for policymakers accreditors institutional leaders and scholars in higher education Accreditation on the Edge offers a comprehensive analysis of the critical issues that accreditation reform needs to address if it is to serve the future of a fast changing higher education environment Contributors Armand Alacbay David A Bergeron Alana Dunagan Judith S Eaton Peter T Ewell Madeleine F Green Thomas L Harnisch Michael B Horn Kevin Kinser Edwin W Koc Paul J LeBlanc Sylvia Manning Leah K Matthews Barmak Nassirian Anne Neal Audrey Peek Susan D Phillips Mark Schneider Jamiene S Studley Joseph Vibert *Colleges Worth Your Money* Andrew Belasco, Dave Bergman, Michael Trivette, 2024-06-01 *Colleges Worth Your Money* A Guide to What America s Top Schools Can Do for You is an invaluable guide for students making the crucial decision of where to attend college when our thinking about higher education is radically changing At a time when costs are soaring and competition for admission is higher than ever the college bound need to know how prospective schools will benefit them both as students and after graduation *Colleges Worth Your Money* provides the most up to date accurate and comprehensive information for gauging the ROI of America s top schools including In depth profiles of 200 of the top colleges and universities across the U S Over 75 key statistics about each school that cover unique admissions related data points such as gender specific acceptance rates early decision acceptance rates and five year admissions trends at each college The solid facts on career outcomes including the school s connections with recruiters the rate of employment post graduation where students land internships the companies most likely to hire students from a particular school and much more Data and commentary on each college s merit and need based aid awards average student debt and starting salary outcomes *Top Colleges for America s Top Majors* lists highlighting schools that have the best programs in 40 disciplines Lists of the Top Feeder undergraduate colleges into medical school law school tech journalism Wall Street engineering and more

Cairns, 2015-01-09 Shifting cultivation is one of the oldest forms of subsistence agriculture and is still practised by millions of poor people in the tropics Typically it involves clearing land often forest for the growing of crops for a few years and then moving on to new sites leaving the earlier ground fallow to regain its soil fertility This book brings together the best of science and farmer experimentation vividly illustrating the enormous diversity of shifting cultivation systems as well as the power of human ingenuity Some critics have tended to disparage shifting cultivation sometimes called swidden cultivation or slash and burn agriculture as unsustainable due to its supposed role in deforestation and land degradation However the book shows that

such indigenous practices as they have evolved over time can be highly adaptive to land and ecology In contrast scientific agricultural solutions imposed from outside can be far more damaging to the environment and local communities The book focuses on successful agricultural strategies of upland farmers particularly in south and south east Asia and presents over 50 contributions by scholars from around the world and from various disciplines including agricultural economics ecology and anthropology It is a sequel to the much praised *Voices from the Forest Integrating Indigenous Knowledge into Sustainable Upland Farming* RFF Press 2007 but all chapters are completely new and there is a greater emphasis on the contemporary challenges of climate change and biodiversity conservation *Chicago Tribune Index* ,2008
