Carr,2024-09-26 Technology is an important part of our everyday lives Whether we ask Alexa to start the coffee machine or check our phones for the traffic report we increasingly interact with technology As much as we may enjoy and rely upon technology it is not without its challenges including the inability of the law to keep pace with technological developments and the ethical issues that arise For example tort law is impacted by technology the proliferation of drones requires a new look at the law of trespass and video Zoom meetings can impose direct liability on employers for example Social media supports an increasing share of all advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients

there are several significant new developments The issue with this development is that the risk of Babylonian language confusion is growing exponentially Our observations indicate that this risk is particularly prevalent in the dialogue between science and practice This book hopes to contribute to the clarification with quick access to all key terms Obviously many online marketplaces platforms encyclopedias and glossaries already exist However our pre book analysis has revealed that neither is even close to completion sometimes with imprecise language and often with contradictory definitions and explanations This glossary provides quick access for managers students and professors alike who are faced with the topics in their daily work Students may keep track of the web 3 0 s numerous terms as they study it Instructors teachers and professors may use it as a guide for a consistent use of Metaverse NFT Cryptocurrency and Blockchain terminology Although the more than 1 300 explanations of the individual terms are scientifically based the focus is on easy understanding of the terms The authors have made an effort to provide clear and concise definitions an application focused perspective and simple language
