Credit Derivatives Pricing Models Philipp J. Schönbucher, 2003-10-31 The credit derivatives market is booming and for the first time expanding into the banking sector which previously has had very little exposure to quantitative modeling This phenomenon has forced a large number of professionals to confront this issue for the first time Credit Derivatives Pricing Models provides an extremely comprehensive overview of the most current areas in credit risk modeling as applied to the pricing of credit derivatives As one of the first books to uniquely focus on pricing this title is also an excellent complement to other books on the application of credit derivatives Based on proven techniques that have been tested time and again this comprehensive resource provides readers with the knowledge and guidance to effectively use credit derivatives pricing models Filled with relevant examples that are applied to real world pricing problems Credit Derivatives Pricing Models paves a clear path for a better understanding of this complex issue Dr Philipp J Schönbucher is a professor at the Swiss Federal Institute of Technology ETH Zurich and has degrees in mathematics from Oxford University and a PhD in economics from Bonn University He has taught various training courses organized by ICM and CIFT and lectured at risk conferences for practitioners on credit derivatives pricing credit risk modeling and implementation

The Impact of Banking Crises on Money Demand and Price Stability Maria Soledad Martinez Peria, 2000 Policymakers in countries undergoing banking crises should not worry about the structural stability of money demand functions the behavior of money demand during crises can be modeled by the same function used during periods of tranquility But policymakers should be aware that in some instances crises can give rise to variance instability in the price or inflation equations

Interest Rate Models - Theory and Practice Damiano Brigo, Fabio Mercurio, 2007-09-26 The 2nd edition of this successful book has several new features The calibration discussion of the basic LIBOR market model has been enriched considerably with an analysis of the impact of the swaptions interpolation technique and of the exogenous instantaneous correlation on the calibration outputs A discussion of historical estimation of the instantaneous correlation matrix and of rank reduction has been added and a LIBOR model

consistent swaption volatility interpolation technique has been introduced The old sections devoted to the smile issue in the LIBOR market model have been enlarged into several new chapters New sections on local volatility dynamics and on stochastic volatility models have been added with a thorough treatment of the recently developed uncertain volatility approach Examples of calibrations to real market data are now considered The fast growing interest for hybrid products has led to new chapters A special focus here is devoted to the pricing of inflation linked derivatives The three final new chapters of this second edition are devoted to credit Since Credit Derivatives are increasingly fundamental and since in the reduced form modeling framework much of the technique involved is analogous to interest rate modeling Credit Derivatives mostly Credit Default Swaps CDS CDS Options and Constant Maturity CDS are discussed building on the basic short rate models and market models introduced earlier for the default free market Counterparty risk in interest rate payoff valuation is also considered motivated by the recent Basel II framework developments
