will cease to be sustainable So which account is true Since people are still making a living as artists today how are they managing to do it William Deresiewicz a leading critic of the arts and of contemporary culture set out to answer those questions Based on interviews with artists of all kinds *The Death of the Artist* argues that we are in the midst of an epochal transformation If artists were artisans in the Renaissance bohemians in the nineteenth century and professionals in the twentieth a new paradigm is emerging in the digital age one that is changing our fundamental ideas about the nature of art and the role of the artist in society

The End of Ownership Aaron Perzanowski, Jason Schultz, 2018-03-16 An argument for retaining the notion of personal property in the products we buy in the digital marketplace If you buy a book at the bookstore you own it You can take it home scribble in the margins put it on the shelf lend it to a friend sell it at a garage sale But is the same thing true for the ebooks or other digital goods you buy Retailers and copyright holders argue that you don't own those purchases you merely license them That means your ebook vendor can delete the book from your device without warning or explanation as Amazon deleted Orwell's *1984* from the Kindles of surprised readers several years ago These readers thought they owned their copies of *1984* Until it turned out they didn't In *The End of Ownership* Aaron Perzanowski and Jason Schultz explore how notions of ownership have shifted in the digital marketplace and make an argument for the benefits of personal property Of course ebooks cloud storage streaming and other digital goods offer users convenience and flexibility But Perzanowski and Schultz warn consumers should be aware of the tradeoffs involving user constraints permanence and privacy The rights of private property are clear but few people manage to read their end user agreements Perzanowski and Schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits But most important it would affirm our sense of self direction and autonomy If we own our purchases we are free to make whatever lawful use of them we please Technology need not constrain our freedom it can also empower us
