Online Science Learning: Best Practices and Technologies Downing, Kevin, Holtz, Jennifer, 2008-05-31 The continued growth in general studies and liberal arts and science programs online has led to a rise in the number of students whose science learning experiences are web based. However, little is known about what is actually going on in web based science courses at the level of the disciplines within liberal arts and sciences or the corresponding course design features. Online Science Learning: Best Practices and Technologies reviews trends and efforts in web based science instruction and evaluates contemporary philosophies and pedagogies of online science instruction. This title on an emergent and vital area of education clearly demonstrates how to enrich the academic character and quality of web based science instruction. Girls and Women of Color In STEM Barbara Polnick, Julia Ballenger, Beverly Irby, Nahed Abdelrahman, 2020-09-01 Though there has been a rapid increase of women's representation in law and business, their representation in STEM fields has not been matched. Researchers have revealed that there are several environmental and social barriers including stereotypes, gender bias, and the climate of science and engineering departments in colleges and universities that continue to block women's progress in STEM. In this book, the authors address the issues that encounter women of color in STEM in higher education.

The Everything STEM Handbook Rihab Sawah, Anthony Clark, 2015-08-09 A guide for parents hoping to teach their kids the basics of STEM: Science, Technology, Engineering, and Mathematics. **Best Practices in Online Teaching and Learning across Academic Disciplines** Ross C. Alexander, 2017-10-17 Online teaching and learning has surged in recent years, and faculty who normally teach in face-to-face settings are increasingly called upon to teach blended, hybrid, and fully online courses. Best Practices in Online Teaching and Learning across Academic Disciplines provides insights from experienced university teachers and scholars across multiple disciplines, including social sciences, humanities, natural sciences, mathematics, and professional programs such as nursing education and business administration, who share innovative practices, pedagogies, and instructional design techniques. This work highlights and features effective, practical, innovative, and engaging best practices and approaches in online teaching and instructional design that can assist university faculty members and teachers, course designers and developers, and administrators invested and involved in online education. Using a common theme and structure, each chapter is co-authored by faculty members possessing a wealth of experience and credentialing in online teaching and instructional design in the relevant discipline or sub-discipline. Chapters include best practices, approaches, and techniques within the discipline, as well as relevant innovative and specific tools and strategies that improve student engagement and outcomes. The book will appeal to faculty members and administrators in higher education teaching or designing online courses or entire online curricula, as well as instructional design staff working with and training faculty. Readers will be especially interested to discover lessons about how contributors have successfully taught and designed courses in disciplines not typically associated with online learning, such as mathematics, composition, writing,

drawing hard sciences and speech among others Distributed for George Mason University Press **How to STEM** Carol Smallwood, Vera Gubnitskaia, 2013-12-05 During the past few years groups like the President's Council of Advisors on Science and Technology Center for Education have been placing great emphasis on the significance of STEM science technology engineering and math education In brief the US is seen as falling behind the rest of the world in science and technology education In response the curricula have been revised in many educational institutions and school districts across the country It is clear that for STEM to be successful other community organizations most particularly libraries need to be closely involved in the process Library staff realize the importance of getting involved in STEM education but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization This book is designed to meet that need It is timely and relevant **How to STEM Science Technology Engineering and Math Education in Libraries** is by and for libraries who are involved in contributing efforts into advancing these subjects It is organized in 9 parts including funding grant writing community partnerships outreach research and examples of specific programming activities Authors are drawn from the professional staffs of educational institutions libraries and non profit organizations such as science museums The book contains eight parts each emphasizing a different aspect of how to succeed with STEM Part 1 emphasizes how hands on activities that are both fun and educational can be used to further STEM awareness Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages The final section of **How to STEM Science Technology Engineering and Math Education in Libraries** addresses the funding of these programs Librarians of all types will be pleased to discover easy to implement suggestions for collaborative efforts many rich and diverse programming ideas strategies for improving reference services and library instruction to speakers of English as a second language marketing and promotional tips designed to welcome multicultural patrons into the library and much more
