Soda Science Susan Greenhalgh,2024-08-21 Takes readers deep inside the secret world of corporate science where powerful companies and allied academic scientists mold research to meet industry needs The 1990s were tough times for the soda industry In the United States obesity rates were exploding Public health critics pointed to sugary soda as a main culprit and advocated for soda taxes that might decrease the consumption of sweetened beverages and threaten the revenues of the giant soda companies Soda Science tells the story of how industry leader Coca Cola mobilized allies in academia to create a soda defense science that would protect profits by advocating exercise not dietary restraint as the priority solution to obesity a view few experts accept Anthropologist and science studies specialist Susan Greenhalgh discovers a hidden world of science making with distinctive organizations social networks knowledge making practices and ethical claims dedicated to creating industry friendly science and keeping it under wraps By tracing the birth maturation death and afterlife of the science they made Greenhalgh shows how corporate science has managed to gain such a hold over our lives Spanning twenty years her investigation takes her from the US where the science was made to China a key market for sugary soda In the US soda science was a critical force in the making of today s society of step counting fitness tracking weight obsessed citizens In China this distorted science has left its mark not just on national obesity policies but on the apparatus for managing chronic disease generally By following the scientists and their ambitious schemes to make the world safe for Coke Greenhalgh offers an account that is more global and yet more human than the story that dominates public understanding today Coke s research isn t fake science Greenhalgh argues it was real science conducted by real and eminent scientists but distorted by its aim Her gripping book raises crucial questions about conflicts of interest in scientific research the funding behind familiar messages about health and the cunning ways giant corporations come to shape our diets lifestyles and health to their own needs

The Virgin Diet JJ Virgin,2012-12-04 For listeners who are tired of counting calories without seeing results or who find it impossible to lose weight no matter how many calories they count or carbs they cut and those who struggle with any type of inflammation

Encyclopedia of Diet: A Treatise on the Food Question (Complete) Eugene Christian,2020-09-28 Countless centuries have come and gone and have left on the earth myriad forms of life but just what life is from whence it came whether or not there is purpose or design behind it whether or not all the sacred books are mere conceptions of the infant mind of the whence and whither we do not know but when we put

life beneath the searchlight of science we do know that it is a mere assembling of ionic matter into organic forms and that this strange work is done in accordance with certain well defined laws We know that these laws are a part of the great cosmic scheme In harmony with them works evolution which tends to lift to higher and higher degrees of perfection all forms of both animate and inanimate life We believe that if all the natural laws governing life could be ascertained and obeyed the number of disorders or interferences with Nature s scheme would be very greatly decreased Man s system of co operating with his fellow creatures which we call civilization has imposed certain restrictions duties and limitations upon him which make it impossible for him to live in strict accordance with these laws therefore if he would have his birthright which is health he must employ science to fit him into his artificial environment Man has been brought to his present state of physical development on the rural outdoor close to nature plan and since he must live in houses and pursue occupations foreign to those through which he was developed he must make corresponding changes in the material from which his body is constantly being repaired and made therefore as the selections combinations and proportions of the various things he needs for nourishment are determined by his age activity and exposure to the open air if he accurately or even approximately ascertains and observes these things life will continually ascend in the scale of power and grandeur and his endurance and period of longevity will be increased Nearly all forms of life on this globe except man live approximately eight times their period of maturity Man matures at twenty four measured by this scale he should live about two hundred years But the average life of civilized man reckoning from the age of six is only about forty years while if we include the infant class and reckon the average age from his birth he scarcely gets his growth before his hair and teeth are disappearing and his eyesight is being propped up by the lens of the oculist and he quietly drops into his grave One hundred and sixty years of life then is about what civilization has cost him up to date This is very expensive but of course he has something to show for it He has aeroplanes wireless communication the mile a minute train politics several kinds of religion rum and cocain the tramp the billionaire and the bread line We cannot consistently leap over ten thousand years of heredity and habit but we can recover some part of the one hundred and sixty years of life civilization has cost us This can be done by feeding our bodies according to their requirements determined by age temperature of environment and work or activity by cultivating mental tranquillity by loving some one besides ourselves and proving it by breathing an abundance of fresh air and by doing useful work Of all these things food is the most important because it is the raw material that builds the temple wherein all other things dwell Civilization and science are doing but little real good for man if they cannot select for him the material necessary to develop his body and all its faculties to their highest degree or at least free him from much of his disease and materially increase his ease they have brought him but little I say if they cannot show him a way to live more than forty years Science would have nothing of which to boast if it only pointed out a way by which man could exist for two hundred years as this is his birthright It can only boast when it has given him more than his natural heritage That man s general health and period of longevity

have decreased while all other branches of science have so vastly increased is evidence sufficient to justify the assertion that he has not employed scientific methods to the art of living or at least to those fundamental principles such as nutrition motion and oxidation which really govern his health and his life The difference between youth and age between virility and senility is in reality a chemical difference only The difference between the flexible cartilage of youth and the stiff cartilage of age is one of chemistry *Parasitism: The Good, The Bad and The Ugly* Marco A. Juarez-Estrada,Guillermo

Tellez-Isaias,Danielle Mahaffey Graham,2023-11-07 Parasitism is a tight association between species in which one organism the parasite lives on or inside the host causing it harm and is structurally adapted to this way of life Until the twenty first century parasitism was studied by parasitologists rather than ecologists or evolutionary biologists Today parasitism is a major element of evolutionary ecology as nearly all free living animals are hosts to at least one parasite species Since it is in the parasite s evolutionary interest for its host to flourish long term coevolution can lead to a stable relationship bordering on mutualism According to Lynn Margulis when resources are scarce natural selection moves relationships from parasitism to mutualism as it was brilliantly illustrated in Margulis endosymbiosis theory where eukaryotic mitochondria and chloroplasts descended from formerly free living prokaryotes Boundary between mutualism symbiosis and pathological parasitism is a thin red line that frequently overlapping without a theory enough clear to explain this thigh relationship between the parasite and its host **The Routledge Handbook of Research Methods in the Study of Religion** Steven Engler,Michael

Always Hungry? David S. Ludwig, 2016-01-07 ALWAYS HUNGRY will be both a relief and a revelation to many who struggle with weight We're not getting fat because we're overeating we're overeating because we're getting fat In other words what makes us constantly hungry overweight and undernourished is not a lack of will power but a biological reaction to our present day diet and lifestyle Our fat cells are hoarding the nutrients from the food we eat instead of releasing them into the bloodstream to be used triggering a starvation response that sets us up for failure if we eat more we'll gain weight if we eat less we'll slow our metabolism down and again gain weight HELP ALWAYS HUNGRY shows us how to break out of this cycle that is keeping us overweight It helps us to re-programme our fat cells tame hunger boost our metabolism lose weight In a clear compassionate and authoritative voice Dr Ludwig debunks the calorie myth that losing weight is simply a matter of eating less He explains the science and the research behind our epidemic of overweightness and presents a detailed highly structured plan to help us conquer the cravings
