Frontier Research on Artificial Intelligence and Radiomics in Neurodegenerative Diseases Shi-Nan Wu, Wencai Liu, Qi Zhang, Fuqing Zhou, 2025-11-13

As the global population ages, the prevalence of neurodegenerative diseases is rising, posing significant challenges to healthcare systems. Artificial intelligence (AI) and radiomics are emerging as powerful tools in this domain, offering innovative methods for diagnosing, monitoring, and treating these conditions. Radiomics enables the extraction of quantitative features from medical images, while AI excels at analyzing large datasets and identifying patterns that might be imperceptible to the human eye. The integration of these technologies, particularly in neuroimaging, holds the potential to revolutionize our understanding and management of neurodegenerative diseases. The goal of this research is to address the complex challenges posed by neurodegenerative

diseases through the application of AI and radiomics Specifically we aim to 1 Identify and validate novel imaging biomarkers for the early detection and monitoring of neurodegenerative disorders 2 Develop AI driven predictive models to assess disease progression and treatment outcomes enabling personalized healthcare approaches 3 Utilize machine learning and database mining techniques to analyze extensive health datasets uncovering new insights and correlations specific to neurodegenerative diseases 4 Evaluate the clinical utility of these technologies in enhancing diagnostic accuracy improving patient outcomes and optimizing healthcare resources Blockchain and Artificial Intelligence Tom James,2021-08-23

Blockchain and artificial intelligence are perhaps the two most significant disruptive technologies this century and both will significantly rewire the world of global financial markets and the world in which we live While blockchain offers a number of significant advantages over traditional forms of finance including lower cost and massive increases in operational efficiencies of traded markets property records and a whole host of transaction processes artificial intelligence is moving fast from basic structured machine learning doing menial yet important big data tasks like credit card fraud detection to predictive analysis and real time real world risk management and investment decision making There is still a lot of confusion in the market about cryptocurrencies bitcoin and the underlying blockchain technology Blockchain and Artificial Intelligence highlights the underlying technologies of blockchain and the differences between cryptocurrencies and blockchain financial applications It explores the current AI offerings and gives a vision of the fast moving developments in this area including the many solutions that are expected to revolutionize the way financial and commodity markets will operate in the future
