Captives and Companions Justin Marozzi,2025-10-21 The definitive history of the slave trade in the Islamic world a story that has been overshadowed by its notorious but shorter lived Atlantic counterpart Slavery in the Islamic world has a long complex and controversial history In the earliest days of Islam Arab Muslims enslaved men women and children as the spoils of war In the following centuries young boys were imported to imperial Islamic courts in enormous numbers Some were castrated to serve as eunuch guardians of sacred spaces from the

imperial harem of Istanbul to the Prophet's Mosque in Medina. Others were harvested by the Ottomans to serve as Janissaries, the sultan's elite infantry unit. Some even rose to the highest levels of political and military command, making a mockery of their slave status. For women, leading concubines became powerful figures in their own right. In the ninth century Golden Age of Baghdad, the most beautiful and accomplished courtesans were among the richest, most celebrated figures of their day. In the twentieth century, more than a thousand years later, their cosmopolitan counterparts were still entertaining Ottoman sultans. Yet it was Africa which bore the brunt of the Islamic world's insatiable demand for slave labour. Slavers plied its Mediterranean, Atlantic and Indian Ocean coasts; traders raided inland for human cargo and millions of enslaved Africans trudged across the Sahara into captivity. Meanwhile, North African corsairs turned the Mediterranean into a slaving free for all between Muslims, Christians and Jews. The sheer longevity of slavery was no less surprising. Arab Muslims adapted and regulated this practice within an Islamic context. Sanctioned by the Prophet Mohammed, legitimated by the Quran and holy law, slavery endured for fifteen centuries. Abolition had few champions and came late in the day. Hereditary slavery continues even today in Mali and Mauritania. *Captives and Companions* takes the reader on an extraordinary historical journey across deserts, continents and oceans, from Baghdad to Bamako, Tripoli to Timbuktu, Istanbul to the Black Sea, and reveals a hidden but vital chapter in our understanding of world civilization.

Managing Today's News Media Samir Husni, Debora Halpern Wenger, Hank Price, 2015-07-29. The business of journalism is in the midst of massive change. *Managing Today's News Media* Audience First offers practical solutions on how to cope with and adapt to the evolving media landscape. News media experts Samir Husni, Debora Halpern Wenger and Hank Price introduce a forward-looking framework for understanding why change is occurring and what it means to the business of journalism. Central to this new paradigm is a focus on the audience. The authors introduce The 4Cs Strategy to describe how customers, control, choice and change are all part of a strategy for successful media organizations. Real-world case studies, important theoretical grounding and a focus on understanding rather than resisting the customer's desire for choice and control make this an unbeatable resource for students and managers alike who want to succeed in this changed media business landscape.

Digital Immigrants and Media Integration Sally J. McMillan, 2023-07-03. In *Digital Immigrants and Media Integration*, The Smartphone Is the Synthesizer. Sally J. McMillan draws insights from the lived experience of digital immigrants who are Baby Boomers and who grew up without digital mobile technologies and have transitioned to become smartphone users. McMillan traces key points in media evolution that shaped the communication tools that digital immigrants use today, demonstrating that continued incremental change has led to a shift in focus from media types to media interfaces, with smartphones becoming ubiquitous and indispensable. The smartphone, she posits, is now firmly tied to identity. Although the telegraph was the first medium to allow the message to arrive before the messenger and initiated the transition from cool to hot media, it is the smartphone that has fully synthesized communication forms and functions into a single digital and mobile device. Through collecting and analyzing these personal and public

histories McMillan finds that digital immigrants continue to seek a balance between value and ease and between breadth and depth of communication Scholars of communication media ecology and technology will find this book of particular interest

Multimedia Computing Systems and Virtual Reality Rajeev Tiwari,Neelam Duhan,Mamta Mittal,Abhineet Anand,Muhammad Attique Khan,2022-04-05 Most events and activities in today s world are ordinarily captured using photos videos and other multimedia content Such content has some limitation of storing data and fetching them effectively Three dimensional continuous PC animation is the most proper media to simulate these occasions and activities This book focuses on futuristic trends and innovations in multimedia systems using big data IoT and cloud technologies The authors present recent advancements in multimedia systems as they relate to various application areas such as healthcare services and agriculture related industries The authors also discuss human machine interface design graphics modelling rendering animation image graphics techniques systems and visualization They then go on to explore multimedia content adaptation for interoperable delivery Finally the book covers cultural heritage philosophical ethical societal international issues standards related virtual technology and multimedia uses This book is intended for computer engineers and computer scientists developing applications for multimedia and virtual reality and professionals working in object design and visualization transformation modelling and animation of the real world Features Focuses on futuristic trends and innovations in multimedia systems using big data IoT and cloud technologies Offers opportunity for state of the art approaches methodologies and systems and innovative use of multimedia based emerging technology services in different application areas Discusses human machine interface design graphics modelling rendering animation image graphics techniques systems and visualization Covers cultural heritage philosophical ethical societal international issues standards related virtual technology and multimedia uses Explores multimedia content adaptation for interoperable delivery and recent advancements in multimedia systems in context to various application areas such as healthcare services and agriculture related fields
