Photomedicine in Gynecology and Reproduction P. Wyss, Y. Tadir, B. J. Tromberg, U. Haller, 2000-03-02 The photodynamic technique involves the administration of a photosensitizer followed by application of laser light When light interacts intracellularly with the photosensitizer the photon energy absorbed by the sensitizing molecule mainly generates photooxidation for tissue destruction or fluorescence for diagnostics Photomedical techniques provide a minimally invasive ambulatory procedure in gynecology not needing anesthetics A history of photomedicine explains the main elements and mechanisms of photomedical techniques One of the main chapters is dedicated to the biochemical and biophysical aspects of photomedicine such as characterization of photosensitizers their interaction with light their destruction the optical dosimetry and optical properties of tissues The clinical part of this book summarizes the state of the art activity in all major gynecologic

applications from cervix to breast and provides the reader with an understanding of photodynamic therapy and basic mechanisms Photon assisted reproduction e g laser assisted fertilization embryo hatching and prenatal diagnosis makes up the final chapters Belonging in every hospital or university library this book underscores why photomedicine appeals to such a broad spectrum of students basic scientists clinicians and members of the corporate world Elements of Mammalian Fertilization Paul M. Wassarman,1990-11-26 Elements of Mammalian Fertilization Volume 2 discusses in vitro fertilization IVF in humans and domestic animals and provides insight into potential applications of contemporary experimental approaches to contraceptive development Topics covered include the origins and history of human IVF technical considerations and diverse factors that often determine the success or failure of human IVF the application of IVF to domestic animals and the application of gamete biochemistry and molecular biology toward development of novel methods of contraception This volume addresses some of the most exciting technological developments that have occurred over the past decade developments that have already dramatically affected our lives and will continue to do so in the future It is an important reference source for research scientists clinicians and advanced graduate and medical students **Infertility in Practice, Fourth Edition** Adam H Balen,2014-02-12 The field of infertility research and practice is one of continuous innovation and change but alongside the increasing sophistication of assisted reproductive techniques there is as strong a need as ever for clinical experience and expertise and common practical sense to inform diagnosis and clinical decision making Now in its fourth edition Infertility in Practice is practical and gives the clinician a clear picture of the aetiology of infertility and a careful assessment of the basis for treatment options A thoroughly comprehensive book that provides sound theory and evidence based therapy this book is a must for any practitioner dealing with infertility Recurrent Implantation Failure Jason M. Franasiak,Richard T. Scott Jr.,2018-04-03 This unique text discusses the wide range of causes and pathophysiologic conditions contributing to recurrent implantation failure RIF and the current treatment approaches to best approach this challenging patient population Beginning with a presentation of the mechanism of normal implantation the physiologic synchrony between embryo and endometrium and the roles of both gametes and embryos in RIF the book then examines the various genetic immune and environmental factors involved Abnormalities of the hematologic and endocrine system as well as those of the anatomy and microbiome are described in detail Last but no less important the psychological stress and treatment of patients experiencing RIF is discussed Assisted reproductive technology ART success has increased substantially over the past three decades However despite these advances recurrent implantation failure is still a common issue confronting patients and clinicians and RIF represents one of the greatest challenges in ART and remains a source of frustration and disappointment for patients clinicians and researchers involved in the process Providing an in depth investigation into the pathophysiology and biological mechanisms of RIF and its clinical management this will be an excellent resource for reproductive endocrinologists and infertility specialists
