Addition/change	Description
Attachment Reminder	Before an email message is sent, Outlook 2013 can detect if an attachment was omitted from the message and notify the user. Users can turn off the Attachment Reminder in Outlook 2013 by selecting Don't show this message again in the Attachment Reminder dialog box or by going to File, Options, Mail and under Send messages, selecting Warn me when I send a message that may be missing an attachment. Note: This feature is only available in the English version of Outlook.
Add-in Resiliency	To make Outlook more resilient, by default, Outlook 2013 turns off any add-in that adversely affects performance, resiliency, or reliability of Outlook. Users can view and re-enable add-ins by going to File, View Disabled Add-ins in Outlook 2013. If you, as the IT Administrator, do not want Outlook 2013 to automatically disable an add-in when it affects performance, you can use the Outlook Group Policy template (Outlk15.admx) to set the Group Policy option: List of managed add-ins. You can find this setting under User Configuration/Administrative Templates/Microsoft Outlook 2013/Miscellaneous.

Microsoft Outlook 2013 Guide (Speedy Study Guides) Speedy Publishing, 2014-06-18 Outlook 2013 is an upscale version of the former Outlook. The particular functions are now separated by tabs. The file tab has all the information that is needed to make changes such as save open print options etc. The home tab is where the simple transactions take place such as new mail reply delete etc. Send Receive tab is all about sending and synching files and folders. Folder tab allows changes or formatting to folders. View addresses how you would like to customize the view of your Outlook experience. A chart would be beneficial to compare the old version to the new perhaps showing the ease of the transition. People that prefer the older versions would appreciate knowing where to find the function in the new format if a chart could point this out easily for them. The transition would be much easier.
