Quality Education as a Constitutional Right Theresa Perry, Robert P. Moses, Ernesto Cortes, Jr., Lisa Delpit, Joan T. Wynne, 2010-06-29 In 2005 famed civil rights leader and education activist Robert Moses invited one hundred prominent African American and Latino intellectuals and activists to meet to discuss a proposal for a campaign to guarantee a quality education for all children as a constitutional right, a movement that would transform current approaches to educational inequity, all of which have failed miserably to yield results for our children. The response was passionate and the meeting launched a movement. This book, emerging directly from that effort, reports on what has happened since and calls for a new scale of organizing legal initiatives and public definitions of what a quality education is. Essays include Robert Moses's historically rooted call for citizens, especially young people, to make the demand for quality education; Ernesto Cortes's view from decades of work organizing Latino communities in Texas; Charles Payne's interview with students from the Baltimore Algebra Project who organized to make historic demands on their district; Legal scholar Imani Perry's nuanced analysis of the prospects of making a case for quality education as a right guaranteed by the Constitution; Perspectives from scholars Lisa Delpit and Joan T. Wynne and by teachers Alicia Carroll and Kim Parker who provide examples of what quality education is, describing its goal and how to guide practice in the meantime.

Thinking About Schools Aimee Howley, Craig Howley, 2012-11-12 As its title implies, this book has a deceptively simple mission: to prepare school leaders to draw upon a variety of theoretical perspectives when thinking about schools and schooling. It shows how theories can function as cognitive tools to be mastered carefully, stored in one's intellectual toolbox, and used to interpret and resolve real-world problems. Beneath this goal lies the belief that the most effective leaders are those who are able to construct their own well-grounded interpretations of events and their own responses to those events. Key features of this exciting new text include the following: Focus on Alternative Theories: The functionalist theoretical views that have dominated administrator preparation programs for the last half century are reviewed early in the book and are shown to be inadequate to the task of understanding and coping with the complex realities of modern-day schooling. The remainder of the book presents alternative views of schooling that taken together can be thought of as a theoretical repertoire from which to construct interpretations and solutions to everyday real-world problems. Focus on Diversity: Diversity is examined from a variety of viewpoints. Chapter 6 looks at the cultural bases of leadership; Chapter 7 at comparative and international contexts; and Chapter 8 at gender and sexual orientation. Illustrative Cases: Each chapter contains a case with an embedded dilemma similar to those that real-world administrators confront. While illustrating the particular theoretical view presented in the chapter, these cases are sufficiently

complex that they lend themselves to interpretation by any of the other theories considered in the book This book is appropriate for graduate level courses with titles such as Organizational Theory Theory of School Leadership or Introduction to Educational Administration It might also be used as one of several texts in advanced courses on leadership theory
