Middle Class China Identity And Behaviour Csc China Perspectives Series:

Middle Class China David S. G. Goodman, Minglu Chen, 2013-01-01 A general expectation has developed that China's middle class will generate not only social but also political change. This expectation often overlooks the reality that there is no single Chinese middle class with a common identity or will to action. This timely volume examines the behaviour and identity of the different elements of China's middle class: entrepreneurs, managers and professionals, in order to understand their centrality to the wider processes of social and political change in China. The expert contributors seek to identify the social space occupied by the Chinese middle class rather than identifying social backgrounds and attitudes. In so doing they explore socio-political issues: the development of a consumer society; relationships between gender and class in the workplace; home ownership and the appearance of gated communities; and the political interaction between the Party state and the entrepreneurial middle classes and their impact on the new institutional economics. Providing a more nuanced understanding of the structure of the middle class in China and identifying dynamic elements in their behaviour, this unique book will prove a fascinating and thought-provoking read for academics, students and researchers with an interest in Asian studies and public policy.

Self-Identity Narratives of Chinese Students in the United States Sarah Y. Köksal, 2023-01-31 While previous research has explored the academic adaptation or acculturation processes of Chinese students studying abroad, limited attention has been paid to students' own perspectives and narrations of their experience. To contribute to a more nuanced understanding of this highly mobile group, this study takes a closer look at the students' self-identity narratives. How do they make sense of their foreign adventure? How do they position themselves among their peers and their family members as well as within the greater transnational context? Based on 29 in-depth biographical interviews with Chinese students in the United States, the findings show the participants continuously interpreting and revising their individual academic and cultural identities. In the familial context, a recurring narrative of the high potential only child could be observed. Many students and their family members felt that their unique talents and personalities were not appreciated within the Chinese educational system and thus sought more holistic environments abroad.

The Relationship between Family Influence, Culture, and Digital Transformation Anique Hader, 2025-03-24 In an era marked by the rapid development of digital technologies, established firms face the necessity of digital transformation to remain competitive with digitally native entrants. Despite the acknowledged economic importance of digital transformation for family firms, the evidence is split. While some research suggests that family firms may grapple with digital transformation due to their traditional roots and rigid structures, many family firms are at the forefront of digital transformation within their industries. These differences suggest that there may be family-specific and contextual factors at play that shape the scope and pace at which family firms engage in digital transformation. This book addresses this ambiguity by adopting a qualitative exploratory approach, employing grounded theory methodology to disentangle the interplay of family influence and national culture with digital transformation in family

firms Drawing on rich qualitative data from 31 semi structured interviews with German and Chinese family firms and 24 expert interviews with digital transformation professionals a process model emerged to deepen our understanding of family and cultural influences in shaping the digital transformation process Cultural differences between German and Chinese family firms influence the way digital transformation unfolds but contrary to initial expectations play a minor role in explaining differences in the pace of digital transformation Family influence appeared to be a more salient explanation for these differences The findings show that family influence has a yin and yang effect in that it can bring friction and uncertainty but also promote alignment and long term resilience Ultimately the family s stance on digital transformation shapes both its initiation and execution In addition this book sheds light on the decision logic underlying the uncertain and emerging conditions of digital transformation and offers practitioners valuable insights into the likely impact of these decisions on future outcomes

Being Middle Class in China Ying Miao,2016-11-25 Many studies of the Chinese middle class focus on defining it and viewing its significance for economic development and its potential for sociopolitical modernisation This book goes beyond such objective approaches and considers middle class people s subjective understanding and diverse experiences of class Based on extensive original research including social surveys and detailed interviews the book explores who the middle class think they are what they think about a wide range of socioeconomic and sociopolitical issues and why they think as they do It examines attitudes towards the welfare state social inequality nationalism relations with foreign countries and opinions on many social controversies thereby portraying middle class people as more than simply luxury consumers and potential agents of democracy The book concludes that a clear class identity and political consciousness have yet to emerge but that middle class attitudes are best characterised as searching for a balance between old and new the traditional and the foreign the principled and the pragmatic
