The book presents 21 essays split across four parts from a coterie of artists, theorists, historians and scientists which examine the symbiotic relationship between humans, animals and viruses as well as the impossibility of germ-free existence. The essays in this volume are urgent in their topicality, embodying the exhilarating yet alarming zeitgeist of contemporary nonhuman-to-human viral transmission and gene editing technologies. Ultimately, *Art and Biotechnology* reveals how art and biotechnology influence each other and how art has shaped the discussion around gene editing and the socio-cultural aspects of the Covid-19 pandemic. It is essential reading for students and researchers focussing on science and art, environmental humanities and ethics. **A General History of North and South America**, 1834
