The Fractal Dimension of Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design

Broken Glass Alex Beam, 2020-03-17 The true story of the intimate relationship that gave birth to the Farnsworth House a masterpiece of twentieth century architecture and disintegrated into a bitter feud over love money gender and the very nature of art An intimate portrait alive with architectural intrigue Architect Magazine In 1945 Edith Farnsworth asked the German architect Mies van der Rohe already renowned for his avant garde buildings to design a weekend home for her outside of Chicago Edith was a woman ahead of her time unmarried she was a distinguished medical researcher as well as an accomplished violinist translator and poet The two quickly began spending weekends together talking philosophy Catholic mysticism and of course architecture over wine soaked picnic lunches Their personal and professional collaboration would produce the Farnsworth House one of the most important works of architecture of all time a blindingly original structure made up almost entirely of glass and steel But the minimalist marvel built in 1951 was plagued by cost overruns and a sudden chilling of the two friends mutual affection Though the building became world famous Edith found it impossible to live in because of its constant leaks flooding and complete lack of privacy Alienated and aggrieved she lent her name to a public campaign against Mies cheered on by Frank Lloyd Wright Mies in turn sued her for unpaid monies The ensuing lengthy trial heard evidence of purported incompetence by an acclaimed architect and allegations of psychological cruelty and emotional trauma A commercial dispute litigated in a

rural Illinois courthouse became a trial of modernist art and architecture itself Interweaving personal drama and cultural history Alex Beam presents a stylish enthralling narrative tapestry illuminating the fascinating history behind one of the twentieth century s most beautiful and significant architectural projects *Ludwig Mies van der Rohe* Franz

Linden,2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design Crespi, Luciano,2020-02-07 Interior design can be considered a discipline that ranks among the worlds of art design and architecture and provides the cognitive tools to operate innovatively within the spaces of the contemporary city that

require regeneration Emerging trends in design combine disciplines such as new aesthetic in the world of art design in all its ramifications interior design as a response to more than functional needs and as the demand for qualitative and symbolic values to be added to contemporary environments Cultural Theoretical and Innovative Approaches to Contemporary Interior Design is an essential reference source that approaches contemporary project development through a cultural and theoretical lens and aims to demonstrate that designing spaces interiors and the urban habitat are activities that have independent cultural foundations Featuring research on topics such as contemporary space mass housing and flexible design this book is ideally designed for interior designers architects academics researchers industry professionals and students

Of Spaces and Ideas Petr Chalupský,Tereza Topolovská,2024-11-01 This monograph provides a deeper insight into the work of two contemporary British novelists Jim Crace and Simon Mawer with a particular emphasis on their spatial sensibility as one of the defining elements of their poetics Drawing on a range of literary theoretical approaches to space the study analyses selected novels by the two writers to demonstrate the ways in which they render space and place and above all the ways in which their spatial representations allow them to express the key ideas behind their stories namely those of

identity history and the relationship between an individual and the environment in which they live *The Rise of the Joyful Economy* Michael Hutter, 2015-03-24 This book argues for the increasing importance of the arts as a major resource in fuelling growth through the experiential dimension of today's economy. As we move from the knowledge economy to a new stage called the joyful economy, consumers shift their spending from physical objects and technical know-how to experiences of joy and disappointment. This book investigates how artistic ideas are translated into successful commercial production and how economic growth impacts artistic invention. It examines cases of successful innovation in the creative industries ranging from the Italian Renaissance to the present. The book suggests a framework where social players move in diverse worlds of value which leads to a stream of controversies and manias that result in the establishment of new joy products. Studies include the effect of linear perspective as pioneered by Filippo Brunelleschi, the discovery of taste as an argument for consumption, the serial production of Pop Art and the self-commercialization of contemporary works by artists like Takashi Murakami. This theoretical and empirical study brings together the fields of cultural economics, economic sociology, management studies and cultural history. In doing so, it offers a fascinating study of how creativity has shaped and fuelled commerce.

Pevsner: The BBC Years Stephen Games, 2016-03-09 Pevsner: The BBC Years gives the first full account of Sir Nikolaus Pevsner's engagement with the BBC at a time when both were the dominant institutions in their own fields. Pevsner as the most persuasive figure in architecture and art history, the BBC as the country's sole broadcaster. A German emigré, Pevsner was not at first trusted to speak on the air and was only invited to appear at the very end of the war in spite of his growing eminence in academia and publishing. With the arrival of the Third Programme in 1946, however, he quickly became a broadcasting celebrity and one whom senior BBC figures regarded as essential and novel listening. Pevsner: The BBC Years looks at the sudden rise in Pevsner's standing at the BBC, at what he was admired for and at the circumstances surrounding his being commissioned in the mid 1950s to give the first series of Reith Lectures on an arts subject, the relationship between visual expression and national identity. The book explains the roles played by Geoffrey Grigson, Basil Taylor, Anna Kallin and Leonie Cohn in advancing Pevsner's BBC career, analyses the literary character of his broadcasting and considers the function of his talks as an extension of European belletrism. It also demonstrates the significance of his concurrent editorship of the King Penguin series of books. In addition, Pevsner: The BBC Years documents the unravelling of Pevsner's reputation. It shows how he was caught between changing fashions in media culture and damaged by doubts about the safety of his ideas both within the BBC and externally among British conservatives who found him too radical and American radicals who found him too conservative. In Pevsner: The BBC Years, correspondence from the BBC's archives provides a case study of scholarly thought being exposed to independent scrutiny, a process with lessons for today.
