Mig Killers A Chronology Of U S Air Victories In Vietnam 1965 1973:

MiG Killers Donald J. McCarthy, 2009 In this book author Donald J McCarthy Jr takes you through every engagement resulting in a successful MiG kill by U S Air Force or Navy aircraft He also shows the actual airplane and in many cases traces the history of that airplane through several phases of its operational career Arranged strictly by date this compilation of informative stories and mission descriptions presents a very graphic picture of what the air war in Southeast Asia was really like This book is a compelling story of bravery airmanship and the cunning tactics used in aerial dogfights that made history but will never happen again Jacket *MiG-21 Aces of the Vietnam War* István Toperczer, 2017-09-21 Having learned their trade on the subsonic MiG 17 pilots of the Vietnamese People s Air Force VPAF received their first examples of the legendary MiG 21 supersonic fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the US Air Force US Navy and US Marine Corps crews striking at targets deep in communist territory Although the communist pilots initially struggled to come to terms with the fighter s air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills Indeed by the time the last US aircraft a B 52 was claimed by the VPAF on 28 December 1972 no fewer than 13 pilots had become aces flying the MiG 21 Fully illustrated with wartime photographs and detailed colour artwork plates and including enthralling combat reports this book examines the many variants of the MiG 21 that fought in the conflict the schemes they wore and the pilots that flew them

MiG-17/19 Aces of the Vietnam War István Toperczer, 2016-10-20 At the beginning of the Vietnam War the Vietnam People s Air Force VPAF were equipped with slow old Korean War generation fighters a combination of MiG 17s and MiG 19s types that should have offered little opposition to the cutting edge fighter bombers such as the F 4 Phantom II F 105 Thunderchief and the F 8 Crusader Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority Taking advantage of their jet s unequalled low speed maneuverability small size and powerful cannon armament they were able to take the fight to their missile guided opponents with a number of Vietnamese pilots racking up ace scores Packed with information previously unavailable in the west and only recently released from archives in Vietnam this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam *MiG-17 and MiG-19 Units of the Vietnam War* István Toperczer, 2012-11-20 A detailed history of the MiG 17 and MiG 19 units of the Vietnamese People s Air Force packed with first hand accounts and colour profiles The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War the Vietnamese Peoples Air Force VPAF quickly grew from an ill organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam As this book explores flying Soviet fighters like the MiG 17 and 19 the VPAF produced over a dozen aces whilst the Americans managed just two pilots and three navigators in the same period

Vietnam's Final Air Campaign Stephen Emerson, 2019-08-30 An account of the last American bombardments that took place over North Vietnam while peace talks struggled in Paris Includes maps and photos On March 30 1972 some thirty thousand North Vietnamese troops along with tanks and heavy artillery surged across the demilitarized zone into South Vietnam in the opening round of Hanoi's Easter Offensive By early May South Vietnamese forces were on the ropes and faltering Without the support of U S combat troops who were in their final stage of withdrawing from the country the Saigon government was in danger of total collapse and with it any American hope of a negotiated settlement to the war In response President Richard Nixon called for an aggressive sustained bombardment of North Vietnam Code named Operation Linebacker I the interdiction effort sought to stem the flow of men and materiel southward as well as sever all outside supply lines in the first new bombing of the North Vietnamese heartland in nearly four years To meet the American air armada North Vietnamese MiG fighters took to the skies and surface to air missiles and anti aircraft fire filled the air from May to October over Hanoi and Haiphong With the failure of its Easter Offensive to achieve military victory Hanoi reluctantly returned to the negotiating table in Paris However as the peace talks teetered on the edge of collapse in December 1972 Nixon played his trump card Operation Linebacker II The resulting twelve day Christmas bombing campaign unleashed the full wrath of American air power This book tells the story of these decisive campaigns and how they led finally to a ceasefire agreement

MiG-21 "FISHBED" István Toperczer, 2023-08-17 Using archival photographs sourced directly from Vietnam specially commissioned diagrams and combat accounts from veterans István Toperczer reveals how the MiG 21 defended Vietnam between 1966 and 1968 One of the most successful communist jet fighters ever built the MiG 21 Fishbed was involved in a series of deadly duels with American fighters over North Vietnam as the USAF and US Navy ramped up strike missions during Operation Rolling Thunder culminating in the destruction of over 70 US aircraft for the loss of 35 Fishbeds Having honed their skills on the subsonic MiG 17 pilots of the Vietnam People's Air Force received their first examples of the legendary MiG 21 supersonic fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the American crews striking at targets deep into communist territory Although the communist pilots initially struggled to come to terms with the fighter's air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills The best fighter then available to the VPAF more than 200 MiG 21s of various sub types were supplied to the North Vietnamese In this study leading VPAF authority István Toperczer analyzes the tactics used by the MiG 21 pilots over the bitter fighting in North Vietnam during Rolling Thunder The highspeed hit and run attacks employed by the communist pilots proved to be very successful with both R 3S air to air missiles and heavy caliber cannon inflicting a rising toll on American jets Using first hand accounts from MiG 21 pilots battlescene artwork combat ribbon diagrams and armament views the author details the important role played by the Fishbed in the defense of North Vietnam

anti aircraft artillery as peace prevailed and the advent of the jet aircraft seemed to tilt the balance in favor of the aircraft as they flew faster and higher seemingly beyond the reach of anti aircraft artillery It would take all the hi tech equipment and the guile and cunning that anti aircraft artillery could muster to try and reclaim pole position It is that story of the tug of war between the aircraft and artillery that forms the narrative of this book as it traces the history of combat employment of anti aircraft artillery from the Korean War in effect the first Jet Age war to the War of Attrition between Arab states and Israel when the missiles came of age sending the aircraft scurrying for cover Mandeep Singh s book is the first attempt to look at the performance of anti aircraft artillery incorporating the views analyses and experiences of Soviet Arab and South Asian Armies through the major wars between 1950 and 1972 *The United States Navy* John C.
