Human Security and Migration in Europe's Southern Borders Susana Ferreira, 2018-12-13 This book examines the management of migratory flows in the Mediterranean within an international security perspective The intense migratory flows registered during the year 2015 and the tragedies in the Mediterranean Sea have tested the mechanisms of the Union's immigration and asylum policies and its ability to respond to humanitarian crises Moreover these flows of varying intensities and geographies represent a threat to the internal security of the EU and its member states By using Spain and Italy as case studies the author theorizes that the EU given its inability to adopt and implement a common policy to effectively manage migratory flows on its Southern border uses a deterrence strategy based on minimum common denominators

A Global Middle East Liat Kozma,Cyrus Schayegh,Avner Wishnitzer,2014-12-03 The start of the twentieth century ushered in a period of unprecedented change in the Middle East These transformations brought about by the emergence of the modern state system and an increasing interaction with a more globalized economy irrevocably altered the political and social structures of the Middle East even as the region itself left its mark on the processes of globalization themselves As a result of these changes there was an intensification in the movement of people commodities and ideas across the globe commercial activity urban space intellectual life leisure culture immigration patterns and education nothing was left untouched It shows how even as the Middle East was responding to increased economic interactions with the rest of the world by restructuring not only local economies but also cultural political and social institutions the region s engagement with these trends altered the nature of globalization itself This period has been seen as one in which the modern state system and its oftentimes artificial boundaries emerged in the Middle East But this book highlights how despite this it was also one of tremendous interconnection Approaching the first period of modern globalization by investigating the movement of people objects and ideas into around and out of the Middle East the authors demonstrate how the Middle East in this period was not simply subject or reactive to the West but rather an active participant in the transnational flows that transformed both the region and the world A Global Middle East offers an examination of a variety of intellectual and more material exchanges such as nascent feminist movements and Islamist ideologies as well as the movement of sex workers across the Mediterranean and Jewish migration into Palestine A Global Middle East emphasises this by examining the multi directional nature of movement across borders as well as this movement s intensity volume and speed By focusing on the theme of mobility as the defining feature of modern globalization in the Middle East it provides an essential examination of the formative years of the region
