## **Migration Baen Science Fiction:**

**The Subject of Race in American Science Fiction** Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today

**Science Fiction Culture** Camille Bacon-Smith, 2000 An inside look at this wonderfully strange universe *Migration* James P. Hogan, 2010-05-01 The world of the past eventually died in the conflagration toward which it had been doggedly heading A more fragmented and diversified order has emerged from the ruins and technology has reappeared to a greater or lesser degree in some places and not at all in others Unique among them is the nation state of Sofi with an exceptional population that has rediscovered advanced science However as the old patterns that led to ruin before begin to reassert themselves across the rest of the world a scientific political movement within Sofi embarks on a years long project to build a generation starship that will enable them to create their own world elsewhere The circumstances and thinking of future generations growing up in the totally unknown situation of a space environment cannot be known Accordingly the mission will include different groups of idealists reformers misfits and dissidents who are not satisfied with the world in miniature that constitutes the original mother ship to go out and build

whatever they want Hence what arrives at the distant star generations hence will be a flotilla of variously run city states frontier towns religious monasteries pleasure resorts urban crushes rural spreads academic retreats and who knows what else The trouble began of course when all the old patterns that they thought they were getting away from started
