Nutritional Foundations and Clinical Applications - E-Book Michele Grodner, Sylvia Escott-Stump, Suzanne Dorner, 2021-10-02 Selected for Doody's Core Titles 2024 in Nutrition Master the nurse's role in therapeutic nutrition and in teaching dietary health Nutritional Foundations and Clinical Applications A Nursing Approach 8th Edition describes nutritional healing and wellness from the nurse's perspective It covers dietary guidelines with a humanistic personal touch using first hand accounts to show how nutrition principles apply to patients in real world practice This edition is updated with the most current guidelines and the latest research on nutrition Written by noted educators Michele Grodner Sylvia Escott Stump and Suzie Dorner this leading nutrition text promotes healthy diets and shows how nutrition may be used in

treating and controlling diseases and disorders Applying Content Knowledge and Critical Thinking Clinical Applications case studies help you apply nutrition principles to real world practice situations Personal Perspective box in each chapter offers a firsthand account of the ways in which nutrition affects patients lives demonstrating the personal touch for which this book is known Teaching Tool boxes include strategies for providing nutrition counseling to patients The Nursing Approach boxes analyze a realistic nutritional case study according to the nursing process Social Issue boxes show how ethical social and community concerns can influence health and wellness Health Debate boxes address the nurse s response to differing opinions or controversies about food nutrition and health concerns Cultural Considerations boxes show how to understand and respect the food and health customs of specific ethnic groups Key terms and a glossary make it easy to learn key vocabulary and concepts NEW Nursing Approach sections include Next Generation NCLEX terminology as well as single episode cases and questions with answers on the Evolve website Media Review Digest C. Edward Wall,2006 **Joyce in the Belly of the Big Truck; Workbook** Joyce A. Cascio,2005-05 *Geriatric Medicine* Michael R. Wasserman,Debra Bakerjian,Sunny Linnebur,Sharon Brangman,Matteo Cesari,Sonja Rosen,2024-02-19 Both volumes sold as a combined set for a one time purchase Older adults represent the most rapidly growing demographic in the U S and in many developed countries around the world The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars year in the US How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance According to the Institute of Medicine physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life It is essential that physicians nurse practitioners physician assistants pharmacists social workers and other health care professionals all be knowledgeable about thegeriatric approach to care Geriatric medicine varies from most other fields in medicine While many specialties function on the basis of evidence based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbookis designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about

focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine
